3. GETTING STARTED (SETUP)

3.1 Charging the Device

Connect the Type-C charging cable to the device's charging port and a suitable power source (e.g., a USB wall adapter or computer USB port). The RGB indicator light will show the charging status. Ensure the device is fully charged before first use for optimal battery performance.

The advertisement features a purple and blue color scheme. At the top right, a green arrow points upwards with the text "67% Increase". The main title "LONG BATTERY LIFE" is prominently displayed in the center, with the word "LONG" in large purple letters and "BATTERY LIFE" in a mix of purple, red, and blue. Below the title, a text box states: "The battery capacity has been upgraded from 900 mAh in the previous VMATE Infinity Edition to 1500 mAh, a 67% increase". A cutaway image of the device's battery is shown above this text. Below the main title, a large image of the VOOPOO VMATE i2 device is shown horizontally, with its RGB light bar illuminated in a rainbow gradient. The device has "VOOPOO" printed on its side. Below the device image, two columns of text are presented. The left column is titled "LONG RGB LIGHT BAR" and says "Show your battery level". The right column is titled "LONG POWER RANGE" and says "8 to 30 W wide power range for multiple styles from MTL to RDL".

3.2 Filling the Pod Cartridge

1. Remove the pod cartridge from the device.
2. Locate and open the silicone plug on the top of the cartridge.
3. Carefully fill the cartridge with your preferred e-liquid through the filling port, avoiding overfilling.
4. Close the silicone plug securely to prevent leakage.
5. For first-time use or with a new cartridge, allow the e-liquid to soak into the coil for 5-10 minutes before vaping. This priming step prevents dry hits and ensures proper coil saturation.

EASY TOP-FILLING

No need to remove your cartridge.

3.3 Installing the Pod Cartridge

After filling, insert the pod cartridge firmly into the device until it clicks into place. Ensure a secure connection for proper operation.

4. OPERATING INSTRUCTIONS

4.1 Vaping

The VMATE i2 features an auto-draw activation. Simply inhale through the mouthpiece to activate the device and produce vapor. There are no buttons to press for activation.

4.2 Airflow Adjustment

Locate the airflow slider on the side of the device. Adjust the slider to customize your vaping experience, from a tighter Mouth-to-Lung (MTL) draw to a looser Restricted Direct-to-Lung (RDL) draw.

4.3 Battery Level Indicator

The RGB light bar on the side of the device indicates the current battery level:

- **Green:** High battery level
- **Blue:** Medium battery level
- **Red:** Low battery level (Recharge immediately)

5. MAINTENANCE

5.1 Cleaning

Regularly clean the device and pod cartridge to ensure optimal performance and hygiene. Use a dry, soft cloth to wipe the device body. Clean the pod connection points and mouthpiece to prevent e-liquid residue buildup.

5.2 Pod Cartridge Replacement

Replace the pod cartridge when you notice a burnt taste, reduced vapor production, or diminished flavor. To replace, simply pull out the old cartridge from the device and insert a new one after filling it with e-liquid and allowing it to prime (as described in Section 3.2).

6. TROUBLESHOOTING

- **No Vapor/Weak Vapor:**

- Check battery level and charge if necessary.
- Ensure the pod cartridge is correctly installed.
- Check e-liquid level; refill if low.
- Replace the pod cartridge if the coil is burnt or old.

- **Leaking:**

- Ensure the silicone plug on the pod is securely closed after filling.
- Avoid overfilling the cartridge.
- Ensure the pod is correctly seated in the device.
- Replace the pod cartridge if the issue persists, as the seal might be compromised.

- **Liquid in Mouth:**

- Avoid aggressive inhaling.
- Ensure the e-liquid level is not too high.
- Clean any condensation from the mouthpiece.
- Replace the pod cartridge if the issue persists.

- **Charging Issues:**

- Ensure the Type-C cable is properly connected to both the device and the power source.
- Try a different Type-C cable or power adapter.
- Clean the charging port for any debris.
