PRODUCT FEATURES

The MORENTO MR7566 Replacement Filter is engineered for superior air purification, featuring a multi-layered filtration system:

- **High-Efficiency Filtration:** Effectively captures 99.97% of airborne particles as small as 0.1 microns, including dust, pollen, pet dander, and other common allergens.
- **Four-Layer System:**
 - **Pre-filter:** Traps larger particles like dust, lint, and pet hair, extending the life of subsequent filters.
 - **H13 True HEPA Filter:** Captures microscopic particles, including PM2.5, pollen, and mold spores.
 - **Activated Carbon Filter:** Absorbs odors from pets, cooking, smoke, and volatile organic compounds (VOCs).
 - **Filter Paper Layer:** Further reduces kitchen fumes and smoke.
- **Long Lifespan:** Designed for durability, with a recommended replacement interval of 6 to 12 months depending on usage.

- **Perfect Fit:** Specifically designed for the MORENTO MR7566 Air Purifier to ensure optimal performance and easy installation.

SETUP AND INSTALLATION

Follow these steps to correctly install your new MORENTO MR7566 Replacement Filter:

1. **Step 1: Prepare the Air Purifier.** Ensure the MORENTO MR7566 Air Purifier is turned off and unplugged from the power outlet before beginning installation.
2. **Step 2: Remove the Back Cover.** Locate the back cover of the air purifier and gently remove it to access the filter compartment.
3. **Step 3: Remove the Old Filter.** Carefully pull out the used filter from the air purifier. Dispose of the old filter responsibly.
4. **Step 4: Insert the New Filter.** Place the new MORENTO MR7566 Replacement Filter into the air purifier, ensuring it fits snugly and correctly.
5. **Step 5: Replace the Cover.** Reattach the back cover of the air purifier securely.

6. **Step 6: Reset Filter Indicator.** Plug the air purifier back in. On the control panel display, locate and press the Filter Reset button to clear the filter replacement indicator.

EASY TO INSTALLATION

Image: A visual guide demonstrating the four key steps for easy installation of the replacement filter: removing the cover, removing the old filter, inserting the new filter, and resetting the filter indicator.

OPERATING THE AIR PURIFIER WITH NEW FILTER

Once the new filter is installed and the indicator reset, your MORENTO MR7566 Air Purifier is ready to resume optimal operation. The filter works continuously to purify your indoor air.

- The air purifier will now effectively capture pollutants, providing cleaner and fresher air.
- For best results, operate the air purifier in a suitable location, allowing for proper air circulation.
- The 7566 purifier's Auto Mode ensures the unit runs in optimal condition, adjusting fan speed based on air quality.

ENJOY YOUR LIFE IN PURE AIR

MAINTENANCE AND FILTER REPLACEMENT

Regular replacement of your MORENTO MR7566 filter is crucial for maintaining the air purifier's efficiency and ensuring continuous clean air in your home.

- **Replacement Schedule:** It is recommended to change your HEPA air purifier filter every 6 to 8 months for optimum performance. If used for approximately 6 hours a day, the filter can last up to 1 year. For 12 hours a day usage, replacement every 6 months is advised.
- **Filter Indicator:** The air purifier will typically have an indicator light or display message to notify you when the filter needs to be replaced. Always reset this indicator after installing a new filter.
- **Disposal:** Dispose of used filters according to local waste disposal guidelines.

GET BETTER FILTRATION

It is recommended that the filter be changed approximately once every 6-8 months for optimum performance.

Image: A visual comparison between a new and an old filter, emphasizing the importance of timely replacement for better filtration. The text recommends changing the filter every 6-8 months.

TROUBLESHOOTING

If you encounter issues after replacing your filter, consider the following common solutions:

- **Filter Indicator Still On:** Ensure you have pressed and held the Filter Reset button on your air purifier's control panel after installing the new filter. Refer to your air purifier's manual for specific instructions on resetting the filter life indicator.
- **Reduced Airflow/Efficiency:** Double-check that the new filter is installed correctly and snugly within the compartment. Ensure the air purifier's back cover is fully closed and secured.
- **Unusual Noises:** Verify that the filter is seated properly and not obstructing any internal components. If noises persist, ensure no foreign objects are inside the air purifier.
- **Odor Persists:** While the activated carbon layer is highly effective, some persistent odors might require additional ventilation or a new filter if the current one has reached its absorption capacity prematurely due to heavy odor.

exposure.

SPECIFICATIONS

Attribute	Detail
Product Dimensions	12.4 x 9 x 9 inches; 2.4 Pounds
Item Model Number	7566 (for the air purifier, filter is MR7566-WF)
Brand	MORENTO
Particle Retention Size	0.1 Micron
UPC	850066943250
