PRODUCT OVERVIEW

The VECELO Twin Size Platform Bed Frame offers a stylish and sturdy foundation for your mattress. It features a fabric upholstered headboard and robust wooden slat support, eliminating the need for a box spring. Its design focuses on durability, comfort, and ease of assembly.

Key Features:

- **Stylish & Elegant:** High-quality linen fabric headboard with built-in memory sponge and button tufting.
- **Upholstered Bed Frame:** Heavy metal frame and 12 solid wood slats provide up to 500lbs weight capacity. Smooth and strong solid wood feet protect floors.
- **Adjustable Headboard Height:** Headboard height is adjustable between 41.7 - 47.7 inches, accommodating mattresses 4 - 12 inches thick.

- **Noise Free Structure:** Equipped with extra quiet straps to reduce noise and rattles for a comfortable night's sleep.
- **Ample Under-bed Storage:** 8 inches of under-bed space is perfect for storing shoes, small storage boxes, and other items.
- **No Box Spring Needed:** Designed for direct mattress placement, saving cost and space.

SETUP & ASSEMBLY

The VECELO bed frame is designed for easy assembly, typically taking around 30 minutes. It is recommended to have two people for assembly to ensure stability and ease of handling larger components.

1. Unpack all components and lay them out on a clean, soft surface to prevent scratches. Verify all parts against the package contents list.
2. Attach the side rails to the headboard and footboard using the provided hardware. Ensure all connections are secure but do not fully tighten until all main components are in place.
3. Install the central support beam and legs. These are crucial for the bed's stability and weight distribution.
4. Place the wooden slats across the frame. The slats are designed to provide direct support for your mattress, eliminating the need for a box spring. Ensure they are evenly spaced and secured.
5. Once all components are assembled, fully tighten all screws and bolts.
6. Carefully place your mattress on the assembled bed frame.

OPERATING INSTRUCTIONS

This bed frame is designed for straightforward use. Simply place your mattress directly onto the wooden slats. No box spring is required.

Adjusting Headboard Height:

The headboard height can be adjusted to accommodate mattresses of varying thicknesses (4 to 12 inches). To adjust, loosen the bolts connecting the headboard to the side rails, slide the headboard to the desired height, and then securely tighten the bolts. Ensure both sides are adjusted evenly.

Under-Bed Storage:

Utilize the 8 inches of clearance beneath the bed frame for convenient storage of items such as shoes, storage bins, or seasonal clothing. This space helps keep your bedroom organized and clutter-free.

MAINTENANCE & CARE

Proper care will extend the life and appearance of your VECELO bed frame.

Cleaning Instructions:

For the fabric upholstered headboard, it is recommended to **Dry Clean Only**. For the metal frame and wooden slats, wipe with a damp cloth and mild detergent if necessary, then dry thoroughly.

Noise Reduction:

The bed frame is equipped with extra quiet straps to minimize noise. Periodically check all bolts and screws to ensure they remain tight. Loose connections can lead to squeaking or instability.

TROUBLESHOOTING

If you encounter any issues with your VECELO bed frame, please refer to the common solutions below. If the problem persists, contact customer support.

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or incorrect assembly.	Ensure all bolts and screws are fully tightened. Review assembly instructions to confirm correct setup.
Squeaking noises.	Loose connections or friction between parts.	Tighten all hardware. Check that the wooden slats are properly seated and not rubbing against the frame.
Missing parts or hardware.	Packaging error or lost during unpacking.	Carefully check all packaging materials. If still missing, contact VECELO customer support with your purchase details.
Headboard not adjusting properly.	Bolts not loosened enough or obstruction.	Ensure the headboard bolts are sufficiently loosened before attempting to slide. Check for any obstructions.
