Troubleshooting

Problem	Possible Cause	Solution
Playpen feels unstable or wobbly.	Joints not fully connected or fasteners not secured.	Check all pipe connections and ensure fasteners are squeezed tightly. Verify anti-slip suction cups are making full contact with the floor.
Difficulty assembling pipes into joints.	Pipes are not aligned correctly or fabric is obstructing.	Ensure pipes are inserted straight and the fabric sleeves are not twisted. Apply gentle, even pressure.
Zipper door does not close smoothly.	Fabric caught in zipper or zipper mechanism is dirty.	Clear any fabric from the zipper path. Clean the zipper with a soft brush if necessary.
