YTXXDEUS WES9064P/WES9064

YTXXDEUS WES9064P/WES9064 Replacement Inner Cutter Blades User Manual

For Panasonic Electric Shavers

1. PRODUCT OVERVIEW

Thank you for choosing YTXXDEUS WES9064P/WES9064 Replacement Inner Cutter Blades. These high-quality replacement blades are designed to restore your electric shaver's optimal performance, providing a smooth and comfortable shave. Made from fine steel, these blades feature a 30° acute angle for efficient cutting from the root of the beard.

3. INSTALLATION (REPLACING INNER BLADES)

To ensure optimal shaving performance, replace your inner cutter blades as recommended in the maintenance section.

1. Ensure the shaver is turned off and unplugged.
2. Carefully remove the outer foil frame from your shaver.
3. Grab the old inner blades firmly on both ends and pull them straight out of the shaver head, one at a time.
4. To insert the new inner blade, hold the blade at both ends at once and press down until the blade snaps securely into the shaver head.
5. Reattach the outer foil frame to the shaver.

Replace the inner blade:

Grab the old blades firmly on both ends and pull them straight out of the razor one at a time. To insert the new inner blade, hold the blade at both ends at once and press down until the blade snaps into the razor.

4. MAINTENANCE

4.1 Cleaning

Regular cleaning of your shaver blades is essential for hygiene and performance. These blades are designed for both wet and dry use, making cleaning straightforward.

- After each use, turn off and unplug the shaver.
- Remove the outer foil and inner blades.
- Rinse the blades and outer foil thoroughly under running water. The stainless steel mesh is designed to fit the skin perfectly and is easy to clean.
- After rinsing, gently dry the components with a towel.
- For disinfection, alcohol can be used on the blades. Regular maintenance with a cotton swab point coating is also recommended.

Image: A hand demonstrating rinsing an electric shaver head under a faucet, highlighting its waterproof design and ease of cleaning.

4.2 Replacement Schedule

Over time, shaver blades naturally wear out, leading to decreased performance and comfort. To maintain your shaver's maximum performance:

- It is recommended to replace the **outer foil** at least annually (every 12 months).
- It is recommended to replace the **inner blades** every two years.

Replacing these components regularly ensures a close, comfortable, and irritation-free shave. Your shaver's cutting parts process millions of hairs, and timely replacement prevents dullness and pitting that can cause skin discomfort.

Detail Clean Every Inch

Trim and shave perfectly and replace the foil every 12 months for best results

Image: A man meticulously shaving his beard, emphasizing the importance of detailed cleaning and replacing the foil every 12 months for optimal results.

5. TROUBLESHOOTING

If you experience a less than satisfying shave, skin discomfort, or reduced cutting efficiency, it is likely due to worn blades. Over time, blades can become dull and pitted. Replacing your inner cutter blades and outer foil according to the recommended schedule (Section 4.2) will typically resolve these issues and restore your shaver's performance.

6. SPECIFICATIONS

- **Product Type:** Replacement Inner Cutter Blades
- **Blade Part Numbers:** WES9064P, WES9064
- **Material:** Fine Steel
- **Blade Angle:** 30° Acute Angle
- **Compatibility:** Panasonic ES6002, ES6003, ES6013, ES6015, ES6016, ES-RT81, ES-RT51, ES-RT20, ES-

RT30, ES-RT401, ES-RT60

- **Manufacturer Model Number:** YTXXFBA-5115-08
