IMPORTANT SAFETY INFORMATION

Always follow basic safety precautions when using electrical appliances to reduce the risk of fire, electric shock, and injury to persons.

- Do not block air inlets or outlets.
- Ensure the appliance is placed on a stable, level surface.
- Unplug the appliance before cleaning or maintenance.
- Keep out of reach of children.
- Use only clean tap water in the water tank.

PRODUCT OVERVIEW

The Philips Smart Humidifier HU1509/00 is designed to combat dry air symptoms and improve indoor air quality. It

features a 3-liter water tank, providing up to 32 hours of continuous operation, and is effective for rooms up to 38 m². Key features include SkyHigh Mist technology for even humidity distribution, aromatherapy functionality, and a silent sleep mode with night light.

SETUP

- Unpacking:** Carefully remove the humidifier from its packaging. Retain packaging for future storage or transport.
- Placement:** Place the humidifier on a firm, level, and water-resistant surface, at least 10 cm (4 inches) away from walls and furniture. Ensure it is not placed directly on carpet or near heat sources.
- Filling the Water Tank:**
 - Remove the top cover and the water tank.
 - Fill the water tank with clean tap water up to the MAX level indicator. Do not overfill.
 - Replace the water tank and ensure it is securely seated.
 - Replace the top cover.
- Power Connection:** Plug the power cord into a suitable electrical outlet.

OPERATING INSTRUCTIONS

Control Panel Overview

The control panel is located on the front of the humidifier and features touch-sensitive buttons and a digital display.

- **Power Button** (): Turns the humidifier on or off.
- **Light Button** (): Adjusts the night light brightness or turns it off.
- **Mode Button** (): Cycles through operating modes (e.g., Auto, Sleep, Manual).
- **Humidity Level Button** (): Sets desired humidity percentage.
- **Timer Button** (): Sets an operating timer.
- **Wi-Fi Indicator** (): Shows Wi-Fi connection status.

Basic Operation

1. **Turning On/Off:** Press the Power button to turn the humidifier on. Press again to turn it off.
2. **Selecting Mode:** Press the Mode button to cycle through available modes.
 - **Auto Mode:** The humidifier automatically adjusts mist output to maintain a comfortable humidity level.
 - **Sleep Mode:** Operates at the lowest fan speed for quiet operation (approx. 19dB) and dims the display lights.

Dormi tranquillamente 19dB*

Image: The humidifier operating in a bedroom setting at night, demonstrating its quiet operation (19dB) and warm night light feature in sleep mode.

- **Manual Mode:** Allows you to manually set the mist output level.
3. **Setting Humidity:** In Manual mode, press the Humidity Level button to select your desired humidity percentage.
 4. **Using the Night Light:** Press the Light button to turn the night light on or off, or to adjust its brightness.
 5. **Aromatherapy Feature:**
 - Locate the aromatherapy pad compartment, usually near the mist outlet or base.
 - Add a few drops of your preferred essential oil onto the aromatherapy pad.
 - Do not add essential oils directly into the water tank.

Profumi rilassanti e illuminazione delicata

MAINTENANCE

Regular cleaning and maintenance are crucial for optimal performance and hygiene of your humidifier.

Daily Maintenance

- Refill the water tank with fresh tap water daily.
- If the humidifier is not in use for more than 24 hours, empty the water tank and dry all parts.

Weekly Cleaning

1. **Unplug the Humidifier:** Always disconnect from power before cleaning.
2. **Disassemble:** Remove the top cover, water tank, and any other removable parts as shown in the diagram.

Progettato per una facile pulizia

3. Clean Water Tank and Base:

- Rinse the water tank and water basin with clean water.
- For stubborn deposits, use a soft brush or cloth with a mild detergent.
- Rinse thoroughly to remove all detergent residue.

4. **Clean Mist Outlet:** Wipe the mist outlet with a damp cloth.

5. **Drying:** Allow all parts to air dry completely before reassembling.

Descaling (Monthly or as needed)

If hard water is used, mineral deposits (scale) may accumulate. Descale the unit using a descaling solution or a mixture of white vinegar and water (1:1 ratio).

- Pour the descaling solution into the water basin and let it soak for 30 minutes.
- Scrub any remaining deposits with a soft brush.
- Rinse all parts thoroughly with clean water until the smell of vinegar is gone.

TROUBLESHOOTING

Problem	Possible Cause	Solution
No mist or low mist output.	Water tank empty. Mineral deposits on transducer. Air inlet/outlet blocked.	Refill water tank. Clean the transducer and water basin. Ensure clear airflow around the unit.
Unpleasant odor from humidifier.	Stagnant water. Dirty water tank/base.	Empty and refill water tank daily. Clean the water tank and base thoroughly.
Humidifier not turning on.	Not plugged in. Power outage. Water tank not correctly placed.	Check power connection. Verify power supply. Ensure water tank is securely seated.
Excessive condensation around unit.	Humidity level too high. Unit placed too close to objects.	Reduce desired humidity setting. Move unit further from walls/furniture.
