ACEBEAM ACEBEAM P20

ACEBEAM P20 High-end Professional Long-Range Flashlight User Manual

Model: ACEBEAM P20 | Brand: ACEBEAM

PRODUCT OVERVIEW

The ACEBEAM P20 is a high-performance tactical flashlight designed for long-range illumination and robust use. It features a powerful SBT-90.2 LED, dual switches for versatile operation, and a durable, waterproof construction.

Key Features

- The perfect fusion of CNC precision manufacturing and industrial design.
- Utilizes an SBT-90.2 LED, boasting 5500 lumens output and a throw distance of 1280 meters.
- Dual switches, allowing you to swiftly ON/OFF, or cycle through various modes.
- Long and slim barrel makes it cozily in your hands.
- Quick access to Turbo makes it more reliable at critical moments.
- 3mm thickened tempered glass brings greater durability, shock resistance, and better heat tolerance.
- High strength and impact-resistant HAlII hard-anodized anti-abrasive and corrosion-resistant finish.
- All metal body (A6061-T6 high-quality aluminum alloy) can withstand 1.5-meter drop test; IP68 Dust-proof and Waterproof Rating: Fully submersible to 2 meters / 6.5 feet.

SETUP

Battery Installation

The ACEBEAM P20 uses a 21700 Lithium Ion battery (included). To install or replace the battery, unscrew the tail cap of the flashlight. Insert the 5000mAh battery with the positive (+) end facing towards the head of the flashlight. Screw the tail cap back on tightly to ensure proper contact and maintain the IP68 waterproof rating.

Initial Charge

The included 21700 battery is rechargeable via a USB-C port located directly on the battery itself. Remove the battery from the flashlight and connect it to a USB power source using the provided charging cable. The battery's indicator light will show charging status.

OPERATING INSTRUCTIONS

Dual Switch Operation

The ACEBEAM P20 features both a tactical tail switch and a side switch for versatile control.

Tactical Tail Switch

- Momentary On:** Half-press the tail switch for momentary illumination. Release to turn off.
- Constant On/Off:** Fully press the tail switch until it clicks to turn the flashlight on or off.
- Instant Turbo:** From off, fully press and hold the tail switch for instant Turbo mode.

Side Switch

The side switch controls the various lighting modes and provides a battery power indicator.

- **Mode Cycling:** With the flashlight on, press the side switch to cycle through the modes: Ultra-low → Low → Med 1 → Med 2 → High → Turbo.
- **Strobe:** Double-press the side switch to activate Strobe mode. Press again to return to the previous mode.
- **Battery Indicator:** The light around the side button indicates remaining battery power.

MAINTENANCE

Cleaning and Care

Regularly clean the flashlight body with a soft cloth. For optimal performance, keep the threads and O-rings clean and

lubricated with silicone grease. This helps maintain the waterproof seal.

Battery Charging

As mentioned in the Setup section, the battery is charged directly via its integrated USB-C port. Ensure the battery is fully charged before extended use to maximize runtime.

TROUBLESHOOTING

Side Button Unresponsiveness or Accidental Turbo

Some users have reported the side button being unresponsive with light presses or accidentally activating Turbo mode with firmer presses. This can be due to the tactile feedback of the button requiring a deliberate press. Ensure a firm, direct press on the center of the button. If the issue persists, ensure the tail cap is fully tightened, as a loose connection can sometimes affect switch functionality.

Video: A user demonstrating a potential side button issue on the ACEBEAM P20, showing how light presses might not register or lead to accidental turbo activation.

Flashlight Not Turning On

- Check battery charge:** Ensure the battery is fully charged.
- Battery orientation:** Verify the battery is inserted with the correct polarity (positive end towards the head).
- Tail cap tightness:** Make sure the tail cap is screwed on tightly. A loose tail cap can prevent electrical contact.
- Lockout mode:** The flashlight may be in lockout mode. Hold the side button for 3 seconds to exit lockout.
