6. Maintenance

To maintain the quality and appearance of your pantry cabinet, wipe surfaces with a damp cloth as needed. Avoid using harsh chemicals or abrasive cleaners that could damage the finish.

7. Troubleshooting

- **Doors do not close properly or pop open:** Ensure the cabinet is level on the floor. Check that all hinges are securely tightened and properly aligned. The magnetic catches should be correctly installed and aligned with the door plates. Adjust if necessary.
- **Loose Screws/Wobbly Structure:** If any screws feel loose or the cabinet seems wobbly, re-tighten all assembly hardware. If a hole appears too large for a screw, consider using wood glue or a larger screw (if appropriate and does not damage the panel) to secure the connection.
- **Missing Parts:** If any parts are missing upon arrival, please contact ONBRILL customer support immediately for assistance.
