Initial Charge

Before first use, it is recommended to fully charge your ExtreLife Magsafe Wallet. Place the wallet on a MagSafe or compatible wireless charger. The battery is designed to last up to 4 months on a single charge.

OPERATING INSTRUCTIONS

Card Storage

The wallet features 3 individual card slots designed to comfortably hold up to 8 cards. To access cards, gently push them out from the bottom opening. The RFID-blocking technology helps protect your card information.

MAINTENANCE

To ensure the longevity and appearance of your ExtreLife Magsafe Wallet, follow these simple maintenance guidelines:

- Wipe clean with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- Keep away from extreme temperatures and direct sunlight to prevent material degradation.
- Avoid overstuffing the card slots, as this can stretch the material and affect its shape over time.

- Ensure the magnetic surface is clean and free of debris for optimal attachment to your device.

TROUBLESHOOTING

Find My Connectivity Issues

- **Wallet Not Appearing in Find My:** Ensure the wallet's power button has been short-pressed to turn it on. Verify Bluetooth is enabled on your iPhone and that you are within range. Re-attempt the pairing process as described in the Setup section.
- **Inaccurate Location:** Ensure your iPhone's location services are enabled for the Find My app. The accuracy can vary based on environmental factors and Bluetooth signal strength.

Magnetic Attachment Weakness

- **Wallet Detaching Easily:** Ensure your iPhone or case is MagSafe compatible. Clean the magnetic surfaces on both the wallet and your device/case to remove any dust or debris that might interfere with the magnetic connection.
- **Using a Non-MagSafe Case:** If you are using a non-MagSafe case, the magnetic connection will be significantly weaker or non-existent. Consider using an official MagSafe case or a case with integrated magnetic capabilities.

Card Access Difficulty

- **Cards Stuck or Hard to Remove:** Avoid overstuffing the wallet beyond its recommended 8-card capacity. If cards are difficult to remove, gently push from the bottom opening. The material may loosen slightly with regular use.
