vesicur yeap Herbnifique 3-In-1 Decarboxylator, Oil Infuser, and Gummy Maker Machine Model 203 User Manual

Your comprehensive guide to operating and maintaining your Herbnifique machine.

1. INTRODUCTION

The vesicur yeap Herbnifique 3-In-1 Machine is a versatile appliance designed for decarboxylation, oil infusion, and gummy making. This device simplifies the process of preparing herbal extracts and edibles with precise temperature and time controls. Its compact design and multi-functional capabilities make it a valuable addition to any kitchen.

2. SAFETY INFORMATION

- Read all instructions before use.
 - Do not immerse the main unit in water or other liquids.
 - Keep out of reach of children.
 - Use only with a 110/120V power supply. Using with 220V without a transformer may cause malfunction.
 - Always ensure the lid is properly locked during operation to contain odors and heat.
 - Exercise caution when handling hot components or liquids.
-

3. PACKAGE CONTENTS

Verify that all items are present in your package:

- Herbnifique 3-In-1 Machine (Main Unit)
- Stainless Steel Inner Pot
- Silicone Stirring Tool
- Metal Gummy Stirring Tool
- Stainless Steel Strainer
- Oil & Tincture Press
- Silicone Gummy Molds (various colors)
- Dropper
- Herbal Recipe Book

4. COMPONENT IDENTIFICATION

The Herbifique machine consists of a main base unit, a removable inner pot, and a lid with an integrated control panel and stirring mechanism. The control panel features buttons for power, timer adjustment, temperature adjustment, and mode selection (Gummy/Stir).

Image 4.1: Detail of the control panel and top cover locking design.

5. SETUP

1. **Unpack:** Carefully remove all components from the packaging.
2. **Clean:** Wash the inner pot, stirring tools, strainer, press, and gummy molds with warm, soapy water before first use. Wipe the main unit with a damp cloth.
3. **Assemble Stirring Tool (for Gummy Making):** If using the metal gummy stirring tool, assemble it by attaching the blades to the central shaft as shown in the diagram below.
4. **Placement:** Place the main unit on a stable, flat, heat-resistant surface.
5. **Power Connection:** Plug the power cord into a standard 110/120V electrical outlet.

6. OPERATING INSTRUCTIONS

The Herbnifique machine offers three primary functions: decarboxylation, oil infusion, and gummy making. Refer to the included recipe book for specific ingredient quantities and detailed recipes.

6.1. Decarboxylation

1. Place the silicone stirring tool into the inner pot.
2. Add your herbs to the inner pot.
3. Close the lid and ensure it is securely locked.
4. Press and hold the **ON/OFF** button for 1.5 seconds to power on the device.
5. Adjust the time (e.g., 90 minutes) and temperature (e.g., 225°F) using the **+** and **-** buttons.
6. The machine will begin the decarboxylation process, evenly heating and stirring the herbs.

6.2. Oil Infusion

This process can be started directly after decarboxylation without removing the herbs.

1. After decarboxylation, add your chosen oil (e.g., coconut oil) or butter to the inner pot with the decarboxylated herbs.
2. Close the lid and ensure it is securely locked.
3. Adjust the time (e.g., 2 hours for oil, 2.5 hours for butter) and temperature (e.g., 160°F for oil, 170°F for butter) using the + and - buttons.
4. The machine will infuse the oil/butter, stirring for even extraction.
5. Once complete, carefully remove the inner pot. Use the stainless steel strainer and oil/tincture press to separate the infused oil/butter from the herbs.

Image 6.1: The stirring function promotes even heating for better decarboxylation and infusion results.

6.3. Gummy Making

1. Place the metal gummy stirring tool into the inner pot.
2. Add your gummy ingredients (gelatin, water, infused oil, lecithin, etc.) to the inner pot. Refer to the recipe book for precise measurements.
3. Close the lid and ensure it is securely locked.
4. Press the **Gummy/Stir** button (green light on) to activate the gummy mixing function.
5. Adjust the time (e.g., 45 minutes) and temperature (e.g., 120°F) as needed.
6. Once mixing is complete, use the dropper to fill the silicone gummy molds with the mixture.
7. Allow gummies to set according to your recipe.

6.4. Official Product Video

Video 6.3: An official product video demonstrating the Herbnifique Decarboxylator, Gummy Maker, and Oil Infuser in action, showcasing its various functions and ease of use.

7. MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and optimal performance of your Herbnifique machine. All removable accessories are dishwasher safe.

1. **Unplug:** Always unplug the device from the power outlet before cleaning.
2. **Disassemble:** Remove the inner pot, stirring tools, strainer, and gummy molds.
3. **Wash Removable Parts:** Wash these components with warm, soapy water or place them in the dishwasher. Ensure all residue is removed.
4. **Clean Main Unit:** Wipe the exterior of the main unit and the lid (especially the control panel area) with a damp cloth. Do not immerse the main unit in water.
5. **Dry:** Ensure all parts are completely dry before reassembling or storing.

Easy to Clean

All accessories are dishwasher safe

Image 7.1: Cleaning the Herbnifique machine and its accessories.

8. TROUBLESHOOTING

- **Device not turning on:** Ensure the power cord is securely plugged into a functional 110/120V outlet. Press and hold the **ON/OFF** button for 1.5 seconds.
- **Stirring function not working (outside North America):** The device is designed for 110/120V. If operating in a region with 220V, a voltage transformer is required for the stirring function to operate correctly.
- **Uneven heating/infusion:** Ensure the correct stirring tool is used for the specific function (silicone for decarbing/infusion, metal for gummies). Verify that the lid is securely closed and locked.
- **Odor leakage:** Ensure the lid is properly sealed and locked during operation.

9. SPECIFICATIONS

Feature	Detail
Brand	vesicur yeap
Model Name	203
Color	White
Product Dimensions	6.69"D x 6.5"W x 6.29"H
Item Weight	3.89 pounds
Capacity	2 Cups
Power Source	Corded Electric

Voltage	110V
Blade Material	Stainless Steel
Material	Metal, Silicone, Stainless Steel
