Easybaby Milk Maker Attachment Frame and Bottom Mixing Container (GS-803) Instruction Manual

INTRODUCTION

This instruction manual provides important information for the proper use and maintenance of your Easybaby Milk Maker Attachment Frame and Bottom Mixing Container, specifically designed for the Easybaby Milk Maker Model GS-803.

This product includes one attachment frame and one bottom mixing container. These are original Easybaby replacement or additional parts, ensuring perfect compatibility and performance with your GS-803 Milk Maker.

Using an additional set is highly practical for daily use, as it ensures you always have a clean mixing container available. While your original set is being cleaned, this additional set allows you to continue preparing bottles without interruption.

PRODUCT OVERVIEW

The Easybaby Milk Maker Attachment Frame and Bottom Mixing Container are essential components for the efficient operation of your Easybaby Milk Maker GS-803. This set comprises two distinct parts:

- **Attachment Frame:** This component sits atop the Milk Maker and helps guide the formula powder.
- **Bottom Mixing Container:** This part is where the formula powder is held and mixed before dispensing.

SETUP AND INSTALLATION

Before first use, or after cleaning, ensure both the attachment frame and bottom mixing container are completely dry.

1. **Insert the Bottom Mixing Container:** Carefully place the bottom mixing container into its designated slot on the Easybaby Milk Maker GS-803. Ensure it is seated firmly and correctly.
2. **Place the Attachment Frame:** Position the attachment frame on top of the bottom mixing container. It should align with the grooves or guides on the Milk Maker to ensure a secure fit.
3. **Verify Secure Fit:** Gently press down and ensure both components are securely in place and do not wobble. A proper fit is crucial for the Milk Maker's functionality.

Refer to your Easybaby Milk Maker GS-803 main instruction manual for detailed assembly steps of the complete device.

OPERATING INSTRUCTIONS

Once the attachment frame and bottom mixing container are correctly installed, they are ready for use with your Easybaby Milk Maker GS-803.

1. **Add Formula Powder:** Pour the desired amount of formula powder into the top opening of the attachment frame. The design will guide the powder into the bottom mixing container.
2. **Initiate Mixing:** Follow the operating instructions of your Easybaby Milk Maker GS-803 to start the mixing and dispensing process. The components will work together to ensure accurate and consistent formula preparation.

Always ensure the Milk Maker is clean and properly assembled before each use to maintain hygiene and optimal performance.

CARE AND MAINTENANCE

Proper cleaning and maintenance are essential to ensure the longevity and hygienic operation of your Easybaby Milk Maker components.

- **Daily Rinsing:** It is recommended to rinse the mixing container with water at least once daily after use.
- **Wipe Powder Residue:** After each use of the Milk Maker, it is recommended to wipe off any powder residue from the attachment frame and mixing container with a clean, dry cloth. This prevents buildup and ensures smooth operation.
- **Cleaning Method:** The components are designed for **hand washing only**. Do not place them in a dishwasher, as this may cause damage to the plastic material. Use warm soapy water and a soft brush or sponge to clean thoroughly.
- **Drying:** After washing, allow all parts to air dry completely before reassembling or storing. Ensure no moisture remains to prevent bacterial growth.

TROUBLESHOOTING

If you encounter issues with the attachment frame or bottom mixing container, consider the following:

- **Powder Clogging:** Ensure the components are clean and free of dried formula residue. Wipe off any powder buildup regularly.
- **Improper Fit:** Verify that both the attachment frame and bottom mixing container are correctly seated and securely locked into the Easybaby Milk Maker GS-803. Refer to the setup instructions.
- **Wear and Tear:** If the components show signs of significant wear, cracks, or damage, they should be replaced to ensure safe and effective operation.
