TROUBLESHOOTING

If you encounter issues with your vanity desk, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
LED lights do not turn on or flicker.	Loose connection, power outage, faulty bulb, or issue with the power cord.	Ensure the vanity is properly plugged into a working wall outlet. Check all cable connections. If a specific bulb is out, it may need replacement. If the entire lighting system is unresponsive, contact customer support.
Power outlets/USB ports are not working.	Vanity not plugged in, circuit breaker tripped, or internal wiring issue.	Verify the vanity's main power cord is securely plugged into a live wall outlet. Check your household's circuit breaker. If the issue persists, avoid using the outlets and contact customer support.
Drawers are difficult to open/close or misaligned.	Improper assembly, obstruction, or uneven surface.	Review the assembly instructions for drawer slide installation. Ensure no items are obstructing the drawer's path. Check if the vanity is on a level surface. If holes did not align during assembly, this might cause slight unevenness.
Vanity feels unstable or wobbly.	Loose fasteners, uneven floor, or anti-tipping device not installed.	Check and tighten all screws and bolts. Ensure the vanity is placed on a flat, stable surface. Install the anti-tipping device as per instructions to secure it to the wall.
