NPET WF210

NPET WF210 Cat Water Fountain User Manual

Model: WF210

INTRODUCTION

The NPET WF210 Cat Water Fountain is designed to provide fresh, filtered water for your pets, encouraging them to drink more and stay hydrated. Constructed from durable 304 stainless steel, this fountain features an ultra-quiet pump, a visible water level window, and a multi-layer filtration system to ensure clean and healthy drinking water.

NPET

Stainless Steel Cat Water Fountain

Keep pets hydrated and healthy

Durable & Safe

1.5L/50oz

Image: NPET Stainless Steel Cat Water Fountain, highlighting its durable and safe design, and 1.5L capacity.

Its thoughtful design, including a faucet-like water flow, appeals to cats' natural drinking habits, making it an ideal solution for pet owners seeking to improve their pets' water intake.

PRODUCT COMPONENTS

Before assembly, ensure all components are present and undamaged:

- Stainless Steel Water Bowl

- Stainless Steel Lid
- Filter Tray (plastic)
- Water Pump with USB cable
- Power Adapter
- Filter (non-woven)
- Faucet Spout (optional)
- Cleaning Brush
- Quick Start Guide

SETUP INSTRUCTIONS

Follow these steps to assemble and prepare your NPET WF210 Cat Water Fountain for first use:

1. **Clean Components:** Wash all parts (stainless steel bowl, lid, filter tray, pump, and spout) thoroughly with water before first use. The stainless steel parts are dishwasher-safe.
2. **Assemble Filter:** Insert the non-woven filter into the designated slot in the plastic filter tray. Ensure it sits securely.
3. **Place Pump:** Position the water pump at the bottom of the stainless steel water bowl. The suction cups on the pump will help secure it.
4. **Add Water:** Fill the stainless steel bowl with clean water up to the "MAX" line indicated on the visible window. Do not overfill.
5. **Place Filter Tray and Lid:** Carefully place the filter tray over the pump, ensuring the pump's nozzle aligns with the opening in the tray. Then, place the stainless steel lid on top of the filter tray.
6. **Install Faucet Spout (Optional):** If desired, insert the clear faucet spout into the opening on the lid.
7. **Connect Power:** Route the USB cable from the pump through the designated groove on the lid to prevent pinching. Connect the USB cable to the power adapter, and then plug the adapter into a wall outlet.

OPERATING INSTRUCTIONS

Once assembled and plugged in, the fountain will begin operating automatically. The LED light will illuminate, indicating it is powered on and functioning.

- **Water Level Monitoring:** The visible window on the side of the stainless steel bowl allows you to easily check the water level. Ensure the water level stays above the "MIN" line to prevent the pump from running dry and to maintain quiet operation.
- **Quiet Operation:** The fountain is equipped with an ultra-silent pump (below 40dB) for a peaceful environment. If you notice increased noise, check the water level as it may be low.
- **LED Lighting:** The integrated LED light provides visibility of the water level, especially in low-light conditions, and adds a subtle glow.

Visible Water Level

MAINTENANCE

Regular cleaning and filter replacement are crucial for the longevity of your fountain and the health of your pet.

- **Daily Water Refill:** Check the water level daily and refill as needed to ensure continuous fresh water supply and prevent the pump from running dry.
- **Weekly Cleaning:**
 - a. Unplug the fountain and disassemble all components.
 - b. Wash the stainless steel bowl, lid, and filter tray with mild soap and water. The stainless steel parts are food-grade and dishwasher-safe.
 - c. Clean the pump thoroughly, removing any hair or debris. Use the provided cleaning brush for hard-to-reach areas.
 - d. Rinse all components thoroughly to remove any soap residue.

- **Filter Replacement:** The non-woven filter should be replaced every 2-4 weeks, or more frequently if you have multiple pets or notice reduced water flow. Replacement filters are available from NPET.

5-STAGE Filtration System

TROUBLESHOOTING

Problem	Possible Cause	Solution
Fountain is noisy or pump is loud.	Water level is too low. Pump is dirty or clogged with debris/hair.	Refill water to the MAX line. Disassemble and thoroughly clean the pump and filter.
Water flow is weak or inconsistent.	Filter is clogged. Pump is dirty or obstructed.	Replace the filter. Clean the pump and ensure no obstructions.
Fountain is not turning on.	Power connection issue. Pump malfunction.	Check if the power adapter is securely plugged into the outlet and the USB cable is properly connected to the pump. Try a different outlet. If problem persists, contact customer support.
Water splashing outside the fountain.	Overfilling. Pet playing with water.	Ensure water is filled only to the MAX line. Consider placing the fountain on a pet mat to contain splashes.

SPECIFICATIONS

- Brand: NPET
- Model Number: PXPETWF210-US (WF210)
- Capacity: 1.5 Liters (50oz)
- Material: 304 Stainless Steel
- Item Weight: 1.72 pounds
- Item Package Dimensions: 7.32 x 7.28 x 5.79 inches
