4. MAINTENANCE

To ensure optimal performance and longevity of your SIXTOP Android Car Stereo, follow these maintenance guidelines:

- **Screen Cleaning:** Use a soft, lint-free cloth slightly dampened with a screen cleaner or water to gently wipe the touchscreen. Avoid harsh chemicals or abrasive materials.
- **Software Updates:** Periodically check for system software updates through the unit's settings menu to ensure you have the latest features and security patches.
- **Cable Connections:** Ensure all wiring connections remain secure. Loose connections can lead to intermittent functionality.
- **Environmental Conditions:** Avoid exposing the unit to extreme temperatures or direct sunlight for prolonged periods when the vehicle is parked.

5. TROUBLESHOOTING

If you encounter issues with your car stereo, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse	Check power cable connections. Inspect vehicle's fuse box and replace any blown fuses.
Touchscreen unresponsive or lagging	Software glitch, excessive background apps	Restart the unit. Close unnecessary background applications. Perform a factory reset if the issue persists (note: this will erase data).
CarPlay/Android Auto connection issues	Incorrect phone settings, software incompatibility	Ensure phone's Wi-Fi and Bluetooth are on. Re-pair the device. Update phone's OS and car stereo software.
GPS inaccurate or no signal	GPS antenna obstruction, software issue	Ensure GPS antenna has a clear view of the sky. Check GPS settings in the unit. Restart the unit.
No sound or distorted audio	Incorrect wiring, EQ settings, volume level	Verify speaker wiring. Adjust EQ settings. Check volume levels and mute status.
Backup camera not displaying	Incorrect camera wiring, camera settings	Check camera power and video connections. Ensure the camera input is correctly selected in the unit's settings.

If these steps do not resolve the issue, please contact SIXTOP customer support.
