4. MAINTENANCE

4.1 Cleaning

To clean the beech wood surface, wipe it with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the wood finish. For paint spills, clean immediately with a suitable solvent for the type of paint used, then wipe with a damp cloth.

4.2 Wood Care

The easel is crafted from premium beech wood with hand-sanded rounded corners for safety and durability. To maintain the wood's condition, avoid prolonged exposure to direct sunlight or extreme humidity, which can cause warping or cracking. Periodically, you may apply a wood conditioner or wax to nourish the wood and protect its finish.

4.3 Hardware Check

Regularly inspect all screws, bolts, and moving parts to ensure they are secure. Tighten any loose fasteners to maintain the easel's stability and functionality.

5. TROUBLESHOOTING

5.1 Easel Instability

- **Issue:** The easel wobbles or feels unstable.
- **Solution:** Ensure all assembly screws are fully tightened. Check that the 4 casters are locked when the easel is stationary. Adjust the two leveling bolts on the base to compensate for uneven floor surfaces.

5.2 Difficulty Adjusting Height/Tilt

- **Issue:** The canvas supports or drafting table are difficult to move or do not stay in position.
- **Solution:** Loosen the adjustment knobs sufficiently before attempting to move the components. Ensure the knobs are tightened firmly once the desired position is achieved. Check for any obstructions in the sliding mechanisms.
