4. SETUP

4.1 Battery Installation

The camera requires 3 AA batteries (not included). To install the batteries:

1. Locate the battery compartment on the back of the camera.
2. Using a small Phillips head screwdriver, unscrew the battery compartment cover.
3. Insert 3 new AA batteries, ensuring correct polarity (+/-) as indicated inside the compartment.
4. Replace the cover and secure it with the screw.

Note: The Micro USB cable is for data transfer only and does not charge the batteries. Ensure fresh batteries are used for optimal performance.

4.2 SD Card Insertion

Your camera comes with a 512MB SD card. To insert it:

1. Locate the SD card slot on the side of the camera.
2. Gently push the SD card into the slot until it clicks into place. Ensure the card is oriented correctly.
3. To remove, gently push the card in again until it pops out slightly, then pull it out.

6. MAINTENANCE AND CARE

- Keep the camera clean by wiping it with a soft, dry cloth.
- Avoid exposing the camera to extreme temperatures, direct sunlight, or moisture.
- Do not drop the camera or subject it to strong impacts.
- Remove batteries if the camera will not be used for an extended period to prevent leakage.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not turn on.	Batteries are dead or incorrectly installed.	Replace with fresh AA batteries, ensuring correct polarity.
Camera freezes or becomes unresponsive.	Temporary software glitch or memory issue.	Locate the small "Reset" button (often a pinhole) on the back of the camera (refer to Figure 4 or 6). Use a paperclip to gently press and hold the reset button for a few seconds. This will restart the camera without losing saved data.
Cannot save photos/videos.	SD card is full or not inserted correctly.	Check if the SD card is properly inserted. Transfer files to a computer to free up space, or replace the SD card with a new one.
Poor image/video quality.	Low light conditions, dirty lens, or inherent toy camera limitations.	Ensure adequate lighting. Gently clean the camera lens with a soft, lint-free cloth. Note that this is a toy camera designed for children, and image quality may not match professional cameras.
USB connection not recognized by computer.	Faulty cable, incorrect port, or driver issue.	Try a different USB port on your computer or a different Micro USB cable. Ensure the camera is powered on when connecting.
