## 6. MAINTENANCE

Regular maintenance will help preserve the appearance and functionality of your bed frame.

- **Cleaning:** Wipe the metal and MDF surfaces with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Fasteners:** Periodically check all screws and bolts to ensure they remain tight. Retighten if necessary.
- **LED Lights:** If LED lights malfunction, check the power connection and controller. Do not attempt to repair the LED strip yourself; contact customer support.
- **Drawers:** Keep the drawer rollers free of dust and debris for smooth operation.

## 7. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Bed frame makes noise (squeaking)	Loose fasteners; slats not properly seated; mattress movement.	Check and tighten all screws and bolts. Ensure all slats are securely snapped into place. Verify the anti-slip mattress fixture is correctly installed.
LED lights not working	Power connection issue; remote control battery low; LED strip malfunction.	Ensure the power cord for the LED lights is securely plugged in. Check the remote control battery and replace if needed. If issues persist, contact customer support.
Charging station not providing power	Power cord not plugged in; circuit overload; internal fault.	Verify the charging station's power cord is fully plugged into a working wall outlet. Avoid plugging in too many high-power devices simultaneously. If still not working, contact customer support.
Drawers are difficult to slide or move around too much	Debris in rollers; uneven floor; drawers not aligned.	Clean any debris from the drawer rollers. Ensure the bed frame is on a level surface. Adjust drawer placement for optimal movement.
