XuanPad K10

XuanPad Full HD 1080P Portable Projector

Model: K10

PRODUCT OVERVIEW

The XuanPad K10 Projector is a versatile home theater device designed for an immersive viewing experience. It features official Netflix licensing, automatic focus and keystone correction, and a highly adaptable 210° rotatable stand. With Full HD 1080P native resolution and 4K support, coupled with 700 ANSI brightness, it delivers clear and vibrant images. Advanced connectivity options include WiFi 6 and Bi-directional Bluetooth 5.2, ensuring seamless streaming and audio integration. The projector also incorporates a dust removal and efficient heat dissipation design for enhanced durability and performance.

SETUP GUIDE

Follow these steps for initial setup of your XuanPad K10 Projector:

- 1. Unboxing:** Carefully remove all components from the packaging. Ensure you have the projector, power cord, remote, HDMI cable, and AV cable.
- 2. Power Connection:** Connect the power cord to the projector's power input port and then to a power outlet. The power indicator light will illuminate.
- 3. Placement:** Place the projector on a stable, flat surface. The 210° rotatable stand allows for flexible positioning, including ceiling, tabletop, or floor mounting.
- 4. Initial Power On:** Press the power button on the projector or the remote control to turn on the device.
- 5. Network Setup:** Navigate to the 'Network' settings to connect to your Wi-Fi network. The projector supports fast WiFi 6 for stable wireless connections.
- 6. Auto Focus & Keystone Correction:** The projector features state-of-the-art AI focus and displacement gyroscope technology that automatically focuses and corrects trapezoidal distortion within 3 seconds. Manual adjustments can also be made via the remote if needed.

7. **App Access:** The smart system provides seamless access to certified apps like Netflix. Ensure you are logged into your accounts to access content.

OPERATING INSTRUCTIONS

Adjusting Image Quality

- **Auto Focus & Keystone:** The projector automatically adjusts focus and corrects trapezoidal distortion. For manual adjustment, use the remote control's focus and keystone buttons.
- **Zoom Function:** Adjust the image size from 50% to 100% using the zoom setting in the menu.
- **Brightness & Color:** The projector offers 700 ANSI brightness and covers 99% of the NTSC color gamut. Adjust picture mode settings (e.g., standard, vivid, user) via the menu for optimal viewing.

Auto Screen Adjustment

Connectivity

- **Wi-Fi 6:** Connect to your home network for high-speed, stable streaming and wireless projection.
- **Bi-directional Bluetooth 5.2:** Connect external speakers or headphones for enhanced audio, or use the projector as a standalone Bluetooth speaker.
- **HDMI & USB:** Use the HDMI port to connect external devices like laptops, gaming consoles, or streaming sticks. The USB port allows for media playback from USB drives.

Meet Your Different Installation Needs

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your projector:

- **Dust Removal:** The projector is designed with features to minimize dust accumulation. Periodically clean the exterior with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Heat Dissipation:** Ensure proper ventilation around the projector to allow for effective heat dissipation. Do not block the vents.
- **Lens Cleaning:** Use a specialized lens cleaning cloth and solution to gently clean the projector lens. Avoid touching the lens directly with your fingers.
- **Storage:** When not in use for extended periods, store the projector in a cool, dry place, away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

If you encounter issues with your XuanPad K10 Projector, refer to the following common solutions:

- **No Image/Blurry Image:**

- Ensure the power cord is securely connected.
- Check the focus and keystone settings. The auto-focus feature should correct most blurriness.
- Verify the input source (HDMI, Home) is correctly selected.
- Adjust the projector's position to be perpendicular to the screen/wall.

- **No Sound:**

- Check the projector's volume level and ensure it is not muted.
- Verify audio connection cables (if using external speakers) are properly connected.
- Adjust audio output settings on the connected device.
- If using Bluetooth, ensure the external speaker is paired and connected.

- **Connectivity Issues (Wi-Fi/Bluetooth):**

- Ensure the Wi-Fi network is stable and within range.
- Restart the projector and your Wi-Fi router.
- For Bluetooth, ensure the external device is in pairing mode and within range.

- **Remote Control Not Responding:**

- Check and replace the batteries in the remote control.
- Ensure there are no obstructions between the remote and the projector's IR receiver.

User Guide

****How to Set Up a Projector for the Best Picture Quality****

Step 1: Place the projector at a position perpendicular to the projection screen or wall.

Step 2: Use the electronic focus button to carefully adjust the projection image until it is clear.

Step 3: Use the automatic trapezoidal correction function to adjust the angle of the projection image so that it is perpendicular to the screen.

Step 4: Make sure the projector's resolution setting matches the resolution of the input signal.

Step 5: Adjust the projector's brightness and contrast settings to achieve the best picture quality.

Step 6: Reduce ambient light by using blackout curtains or blinds to ensure the projector is used in a darker environment.

****How to Set Up a Projector for the Best Audio Quality****

Step 1: Make sure the projector's volume is set at a suitable level and is not muted.

Step 2: Ensure that the audio connection cables (such as a 3.5mm audio cable or HDMI cable) are properly connected and not loose or damaged.

Step 3: Make sure the audio output settings of the connected device (such as a computer or phone) are correct, and the volume is not muted or turned down to the lowest level.

Step 4: If the projector supports an audio equalizer function, you can adjust the audio equalizer settings to optimize the sound quality.

Step 5: Use external speakers or a sound system to get better sound quality.

Step 6: Choose a quiet environment to use the projector to reduce the impact of background noise on the sound quality.
