TROUBLESHOOTING

If you encounter any issues with your Xilingol Pack and Play, please refer to the following common solutions:

Problem	Possible Cause	Solution
Playard will not lock into place during setup.	Side rails are not fully extended before pushing down the center hub.	Ensure all four top rails are pulled upwards until they click and lock. Then, push the center hub down firmly. Refer to the assembly video.
Playard is difficult to fold.	Center hub is not pulled up first, or side rail locks are not fully disengaged.	Pull the center hub upwards before attempting to release the side rail locks. Ensure all side rail locks are fully disengaged.
Mobile or music box not functioning.	Improper assembly or winding mechanism issue.	Check that the mobile is correctly assembled and attached. If it is a wind-up music box, ensure it is fully wound.
Bassinet or changing table feels unstable.	Not securely attached to the main playard rails.	Verify that all clips, hooks, or attachment points are firmly engaged with the playard's top rails.
