Eilimy T15

Eilimy T15 Hidden Camera Detector User Manual

MODEL: T15

Brand: Eilimy

INTRODUCTION

The Eilimy T15 Hidden Camera Detector is a versatile anti-spy device designed to protect your privacy and security. It features multiple detection modes, including infrared camera detection, signal strength detection for wireless devices, magnetic field detection for GPS trackers, and a vibration alarm for anti-theft purposes. Its compact and portable design makes it an ideal companion for travel, hotel stays, and ensuring personal privacy in various environments.

SETUP

1. Charging the Device

Before first use, fully charge the Eilimy T15 detector using the provided USB-C charging cable. Connect the cable to the charging port on the device and a compatible USB power source. The charging indicator light will show the charging status.

2. Powering On/Off

To power on the device, press and hold the power button for 3-5 seconds. The indicator lights will illuminate. To power off, press and hold the power button again until the lights turn off.

3. Extending the Antenna

For optimal signal detection, gently extend the telescopic antenna located at the top of the device.

OPERATING MODES

1. Infrared Camera Detection

This mode is used to find hidden camera lenses. Attach the red viewfinder to the device. Look through the viewfinder and slowly scan the area. The red LED lights on the detector will illuminate, and if a hidden camera lens is present, it will reflect the light back as a bright, flashing red spot through the viewfinder. For enhanced visibility, you can also use your phone's camera to scan the area while the detector's red LEDs are active.

Always feeling someone keeping a close eye on you ?

Want to fully protect the business secret information?

Signal Detection

• Detecting Eavesdropping Devices

Figure 3: Scanning a room for hidden cameras using the infrared detection mode.

2. Signal Detection

This function scans for all wireless signals, including those from WiFi cameras, Bluetooth devices, and eavesdropping bugs. Extend the antenna. The closer you get to a signal source, the stronger the signal strength indicator (blue LED lights) will become. You can adjust the sensitivity using the dedicated button to narrow down the detection range and pinpoint the exact location of the wireless device. It is recommended to turn off any known wireless devices in the area before scanning to avoid interference.

Anti-Theft

Stay in a hotel to make your sleep more comfortable and comfortable

Figure 4: The detector's signal detection mode, indicating wireless activity.

3. Magnetic Field Detection

Use this mode to detect magnetic GPS trackers and other magnetic spy devices. Switch the device to the green light mode. Bring the detector close to suspicious areas, such as under car seats or hidden compartments. When the magnetic field sensor detects a magnetic source, the device will emit an audible beep to alert you.

Small and portable, take it with you.

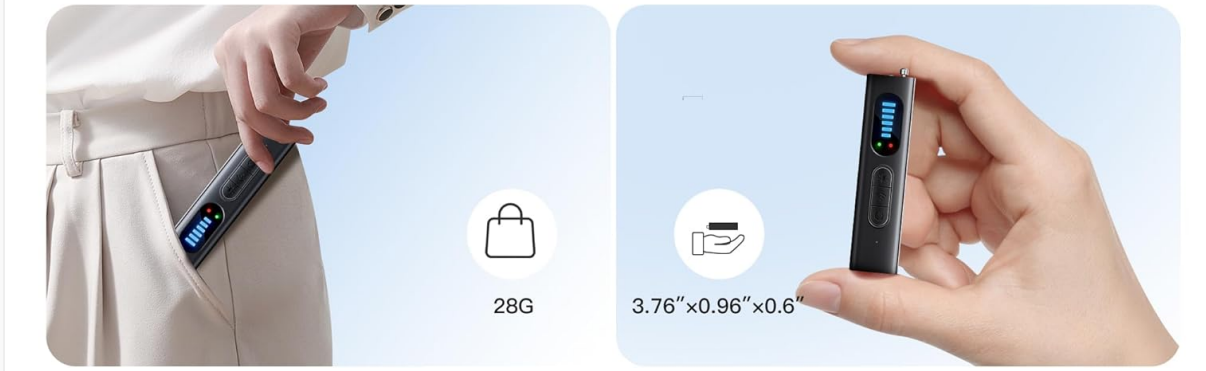

Figure 5: Detecting magnetic devices like GPS trackers.

4. Vibration Alarm (Anti-theft Mode)

For added security, activate the vibration alarm mode. You can hang the device on a doorknob or place it near an entry point. If the device detects any movement or vibration, it will sound a beeping alarm for 10 seconds, alerting you to potential intrusion and deterring unauthorized access.

Still looking for signal detector to live in safety?

Multi-function detector

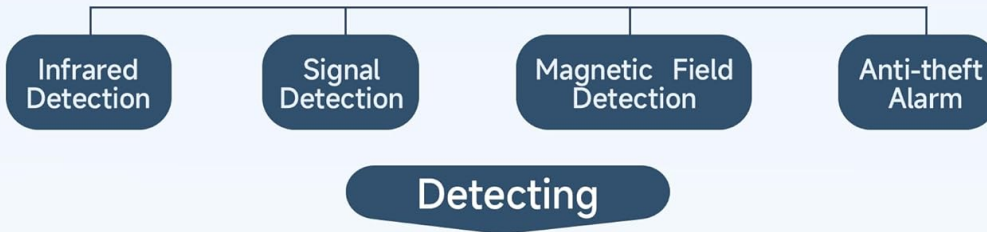

Figure 6: The device set up in anti-theft mode on a door.

5. Flashlight Function

The device includes a built-in flashlight. Short press the dedicated button to switch the signal light to illuminate a small area, useful for inspecting dark corners or hard-to-reach spots.

MAINTENANCE

- Keep the device clean by wiping it with a soft, dry cloth.
- Avoid exposing the device to extreme temperatures, moisture, or direct sunlight.
- Store the device in a cool, dry place when not in use.
- Recharge the battery regularly to maintain optimal performance, even if not used frequently.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not powering on	Low battery; Power button not held long enough	Charge the device; Press and hold the power button for 3-5 seconds
False signal alarms	Interference from known wireless devices	Turn off known wireless devices; Adjust sensitivity to a lower level
Infrared detection not clear	Ambient light too bright; Not scanning slowly enough	Reduce ambient light; Scan the area slowly and methodically; Use phone camera for assistance
Magnetic detection not working	Not in magnetic mode; Device not close enough to magnetic source	Ensure green light mode is active; Bring device closer to the suspected area

SPECIFICATIONS

- **Model:** T15
- **Dimensions:** 0.96 x 0.6 x 3.76 inches
- **Weight:** 2.08 ounces
- **Power Source:** Battery Powered (Rechargeable via USB-C)
- **Connectivity Technology:** Wireless (Signal Detection)
- **Special Features:** Hidden Camera Detector, Bug Detector, Signal Detector, Magnetic Field Detector, GPS Tracker Detector, Vibration Alarm
- **Color:** Black

WHAT'S IN THE BOX

- Eilimy T15 Detector
- Charging cable (USB-C)
- Lanyard
- User Manual
- Extended Warranty Card

WARRANTY AND SUPPORT

For warranty information, please refer to the included Extended Warranty Card. For technical support, troubleshooting assistance, or any product-related inquiries, please contact Eilimy customer service through the contact details provided on the warranty card or the official Eilimy website.
