3. Installation Instructions

Installation of the DESLOC B200 is designed to be straightforward, typically requiring only a screwdriver. Follow these steps for a successful setup:

1. **Prepare the Door:** Ensure your door is compatible with standard US door dimensions (1-3/8" to 2" thickness) and single-cylinder installations. If replacing an existing lock, remove it first.
2. **Install Deadbolt Latch:** Insert the deadbolt latch into the door edge. Ensure it operates smoothly.
3. **Install Exterior Lock:** Route the IC cable from the exterior lock below the deadbolt. Ensure the deadbolt is in the unlock position and the paddle is vertical.
4. **Attach Mounting Plate:** Secure the mounting plate to the door, ensuring the cable passes through the designated hole.
5. **Connect Wiring:** Connect the IC cable from the exterior unit to the interior lock unit.
6. **Install Interior Lock:** Attach the interior lock unit to the mounting plate using the provided screws.
7. **Insert Batteries:** Open the battery compartment on the interior unit and insert 4 AA batteries (not included).
8. **Test Operation:** Verify that the lock operates correctly from both the exterior keypad and the interior turn knob.

4. Operation

The DESLOC B200 offers multiple convenient ways to unlock your door:

- **Fingerprint Recognition:** Place your registered finger on the sensor for quick access (less than 0.3s recognition speed).
- **PIN Codes:** Enter your personalized 4-8 digit PIN code on the keypad. Anti-peeping technology allows you to enter random digits before or after your code for privacy.
- **TTLock App Control:** Use the TTLock app via Bluetooth for unlocking, managing users, generating temporary passcodes, and checking access logs. With an optional G2 Gateway (sold separately), remote control and voice assistant integration (Alexa/Google Assistant) are possible.
- **IC Cards (Fobs):** Tap the provided IC cards on the keypad for quick entry.
- **Physical Keys:** For backup or traditional access, use the included physical keys.
- **Auto-Lock:** Configure the auto-lock feature to automatically secure your door after a set time (5s-900s).

6. Troubleshooting

If you encounter issues with your DESLOC B200 lock, refer to the following common problems and solutions:

- **Fail to Find Lock in App:**
 - Ensure the keypad is activated by touching it.
 - Verify the lock is not already paired to another device.
 - Check if the Master passcode was changed before pairing.
 - Solution: Reset your lock to factory settings and attempt to add it again.
- **Door Not Locking Properly:**
 - Ensure the door is fully closed.
 - Adjust the backset if the deadbolt cannot engage.
 - Verify the hole depth in the backset is greater than 1 inch.
- **Low Battery:** The lock features a low-battery indicator. If batteries run out, use the USB Type-C emergency power port to temporarily power the lock.
