## Yaheetech Upholstered Bed Frame Full Size

# Yaheetech Upholstered Bed Frame Instruction Manual

Model: Full Size Upholstered Bed Frame

Brand: Yaheetech

## 1. INTRODUCTION

---

This manual provides detailed instructions for the assembly, operation, and maintenance of your Yaheetech Full Size Upholstered Bed Frame. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

## 2. SAFETY INFORMATION

---

**WARNING: Failure to follow these safety instructions may result in injury or damage to the product.**

- Carefully adjust the height of the headboard to prevent injury.
- Assemble the bed frame according to the instructions to ensure stability and prevent collapse.
- Do not exceed the maximum weight capacity of 750 lb (340 kg).
- Be cautious of sharp edges to avoid injury during assembly and use.
- Keep all small parts and packaging materials away from children.
- Ensure all connections are securely tightened before use. Periodically check and re-tighten fasteners as needed.

## 3. PACKAGE CONTENTS

---

Before assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Headboard
- Side Rails (Upholstered)
- Footboard (Upholstered)
- Wooden Slats (12 pieces)
- Support Legs (for frame and center support)
- Hardware Pack (bolts, washers, nuts, Allen wrench)
- Installation Manual

# Wood Slats

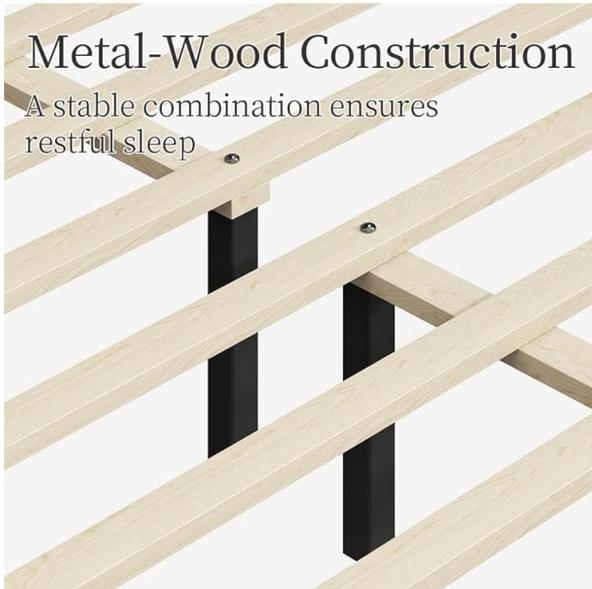

## Supportive & Durable

Spaced slats offer optimum support and breathability

## Metal-Wood Construction

A stable combination ensures restful sleep

## Connected Structure

Avoid Missing Parts

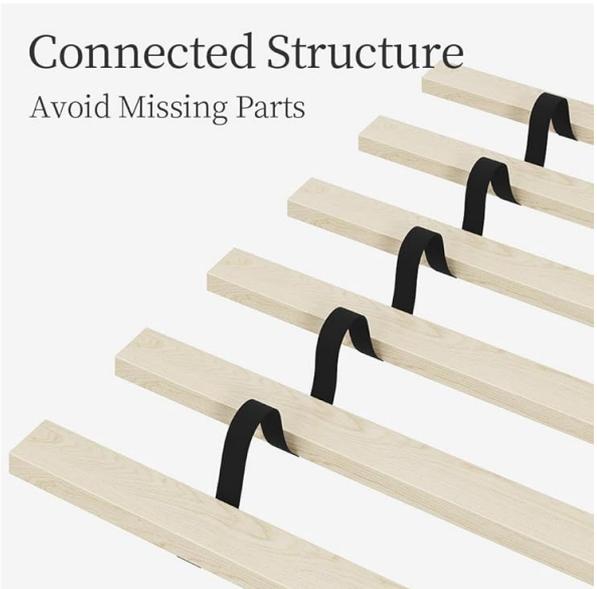

Image 3.1: Detail of the wooden slats and metal-wood construction. This image highlights the supportive and durable design of the bed frame's foundation.

## 4. SETUP AND ASSEMBLY

Assembly of the Yaheetech Upholstered Bed Frame requires two adults and approximately 60-90 minutes. Please follow the step-by-step instructions provided in the included Installation Manual. Ensure you have adequate space for assembly.

### Key Assembly Features:

- **Sturdy Wood Construction:** The frame features an interior solid wood framework, robust support

feet, and 12 durable wooden slats designed for stability and longevity.

- **No Box Spring Needed:** The wooden slat support system eliminates the need for a box spring. Simply place your mattress directly onto the slats.
- **Connected Structure:** Components are designed for a connected structure to minimize missing parts and simplify assembly.

Image 4.2: Visual guide illustrating the "No Box Spring Needed" feature. This shows the progression from frame assembly to mattress placement directly on the slats.

## 5. OPERATING INSTRUCTIONS

---

### Adjusting Headboard Height:

The headboard of your upholstered bed frame is height-adjustable to accommodate various mattress thicknesses and personal preferences. It can be set at two different heights: 40 inches and 43 inches from the floor.

1. To adjust the headboard, locate the pre-drilled holes on the headboard supports and the corresponding attachment points on the bed frame.
2. Loosen the bolts securing the headboard to the frame.
3. Carefully lift or lower the headboard to align with your desired height setting (40" or 43").
4. Re-insert and securely tighten all bolts to ensure the headboard is stable.

Image 5.1: Illustration demonstrating the adjustable headboard feature. This image shows the headboard can be set at 40 inches or 43 inches in height, with recommended mattress heights.

## 6. MAINTENANCE

---

### Cleaning Instructions:

- For general cleaning, wipe the upholstered surfaces with a dry cloth.
- For spills or stains, gently blot with a clean, damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners.
- The bed frame features 6 inches of under-bed clearance, allowing for easy cleaning underneath, including access for robotic vacuum cleaners.

# Easy to Sweep

6" ground clearance allows robot cleaner to pass freely.

Image 6.1: View of the 6-inch ground clearance beneath the bed frame. This demonstrates how a robot cleaner can easily pass underneath for convenient cleaning.

## 7. TROUBLESHOOTING

---

### Common Issues and Solutions:

- **Squeaking Noises:**

- Ensure all bolts and fasteners are securely tightened. Loose connections are a common cause of squeaking.
- Check that the wooden slats are properly seated and not rubbing against the frame.

- **Instability/Wobbling:**

- Verify that the bed frame is assembled on a flat, level surface.
- Re-check all connections to ensure they are tight.
- Confirm that all support legs are making firm contact with the floor.

- **Headboard Not Adjusting:**

- Ensure bolts are sufficiently loosened before attempting to adjust the height.

- Check for any obstructions preventing movement.

If you encounter issues not listed here or require further assistance, please contact Yaheetech customer support.
