## Surdy 6 PCS

# SURDY Pet Food Desiccant Bag (6-Pack) Instruction Manual

Brand: Surdy | Model: 6 PCS

## 1. PRODUCT OVERVIEW

The SURDY Pet Food Desiccant Bag is designed to maintain the freshness and dryness of your pet's dry food by absorbing excess moisture. This 6-pack provides a convenient solution for use in pet food storage containers, including SURDY Automatic Cat Feeders.

Each desiccant bag contains food-grade silica gel, which is cobalt chloride-free, ensuring safety for use near pet food. The silica gel can absorb up to 40% of its weight in water vapor, providing effective moisture control.

Image 1.1: Packaging of the SURDY Pet Food Desiccant Bag 6-pack. The image displays the product's branding and indicates it contains six desiccant bags.

## 2. SETUP INSTRUCTIONS

---

1. **Unpack the Desiccant Bags:** Carefully remove the desiccant bags from their outer packaging.
2. **Inspect for Damage:** Before use, visually inspect each desiccant bag to ensure it is intact and free from any tears or damage. Do not use a damaged bag.

## 3. OPERATING INSTRUCTIONS

---

1. **Placement:** Place one desiccant bag directly inside your pet food storage container or within the designated desiccant compartment of your SURDY Automatic Cat Feeder.
2. **Sealing:** Ensure the pet food container or feeder lid is securely closed after each use. The desiccant bag's effectiveness relies on a sealed environment to absorb moisture from the air.
3. **Quantity:** One desiccant bag is typically sufficient for standard pet food containers. For larger containers or environments with high humidity, using an additional bag may enhance moisture absorption.

## 4. MAINTENANCE

---

SURDY Pet Food Desiccant Bags do not feature a color indicator to signal saturation. Regular replacement is necessary to ensure continuous effectiveness.

- **Replacement Schedule:** It is recommended to replace the desiccant bag periodically, typically every 2 to 4 weeks. This duration may vary based on ambient humidity levels and how frequently the pet food container is opened.
- **Signs of Saturation:** Replace the desiccant bag sooner if you observe signs of moisture in the pet food, such as clumping, softening, or a stale odor.
- **Disposal:** Dispose of used desiccant bags responsibly according to local waste disposal guidelines.

## 5. TROUBLESHOOTING

---

- **Pet Food Still Moist/Stale:**
  - Ensure the pet food container or feeder is completely airtight when closed.
  - Verify the desiccant bag is not fully saturated or expired. Replace with a new bag if necessary.
  - Consider adding an extra desiccant bag for larger food volumes or in highly humid environments.
- **Desiccant Bag Appears Wet:**
  - The desiccant bag should not come into direct contact with liquid. Ensure it is placed in a dry area within the container.
  - If the bag is wet, it may be compromised and should be replaced.

## 6. SPECIFICATIONS

---

<b>Brand</b>	Surdy
<b>Model Number</b>	6 PCS
<b>Included Components</b>	6 Desiccant Bags
<b>Material</b>	Food-grade Silica Gel (Cobalt Chloride Free)

<b>Total Desiccant Weight (6 bags)</b>	Approximately 180 grams
<b>Item Weight (6 bags)</b>	0.2 Kilograms (200 g)
