This image illustrates the versatility of the Bextgoo Q16 mini camera, demonstrating its potential applications in different environments such as a home, office, car, and outdoor settings. A smartphone screen shows a multi-view display from several cameras simultaneously.

Setup

1. **Charge the Camera:** Before first use, fully charge the camera using the provided USB cable and a standard 5V USB power adapter (not included). The indicator light will typically change color or turn off when fully charged.
2. **Insert TF Card:** Gently insert the included 32GB Micro SD card into the SD card slot with the gold contacts facing the correct direction until it clicks into place. Ensure the camera is powered off before inserting or removing the card.
3. **Power On/Off:** Press and hold the ON/OFF button to power the camera on or off. The indicator light will illuminate to show the camera is active.
4. **Wi-Fi Connection (Optional):**
 - Download the recommended surveillance app (refer to the user manual for app name, if specified).
 - Ensure your smartphone is connected to a 2.4G Wi-Fi network. The camera only supports 2.4G Wi-Fi.

- Follow the in-app instructions to add the camera and connect it to your home or office 2.4G Wi-Fi network. This enables real-time viewing and remote control.
5. **Non-Wi-Fi Mode:** If you prefer not to use Wi-Fi, the camera can record directly to the TF card. Simply power it on, and it will begin recording based on its default settings or last configured mode.
 6. **Mounting:** Use the magnetic holder to position the camera on any metallic surface or use a wall mount bracket for secure placement.

Operating Instructions

1. Video Recording:

- **Continuous Recording:** In non-Wi-Fi mode, the camera typically starts continuous recording to the TF card once powered on.
- **App-Controlled Recording:** When connected via Wi-Fi, use the mobile app to start/stop recording, change resolution (up to 4K), and access other settings.

2. Motion Detection:

- Activate motion detection through the mobile app settings.
- When motion is detected, the camera will automatically begin recording and can send alerts to your smartphone if configured.

3. Night Vision:

- The camera features infrared (IR) LEDs for night vision, allowing it to capture clear video up to 20 meters in low-light or no-light conditions.
- Night vision typically activates automatically in dark environments.

4. Viewing Footage:

- **Via App:** For Wi-Fi connected cameras, view live footage or playback recorded videos directly through the mobile application.
- **Direct Access:** Power off the camera, remove the TF card, and insert it into a computer's card reader to access and transfer video files.

Maintenance

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Avoid abrasive cleaners or solvents.
- **Battery Care:** To prolong battery life, avoid extreme temperatures and fully charge the camera before long periods of inactivity.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and moisture when not in use.
- **Firmware Updates:** Check the manufacturer's website or the mobile app periodically for any available firmware updates to ensure optimal performance and security.

Troubleshooting

• Camera Not Turning On:

- Ensure the camera is fully charged.
- Press and hold the ON/OFF button for a few seconds.

- **Wi-Fi Connection Issues / Frequent Disconnections:**

- Confirm your router is broadcasting a 2.4G Wi-Fi signal. The camera does not support 5G Wi-Fi.
- Ensure the camera is within range of your Wi-Fi router.
- Restart your Wi-Fi router and the camera.
- Try resetting the camera to factory settings using the Reset button and re-pairing it with the app.

- **Short Battery Life:**

- Battery life can vary based on usage (e.g., continuous recording, night vision, Wi-Fi streaming).
- Ensure the camera is fully charged before each use.
- Consider connecting the camera to a continuous power source for extended operation.

- **Recording Not Working / SD Card Not Recognized:**

- Ensure the TF card is correctly inserted.
- Format the TF card using the camera's app settings or on a computer.
- Try a different compatible TF card to rule out card issues.

- **Poor Video Quality:**

- Ensure the lens is clean and free from smudges.
- Check the video resolution settings in the app; ensure it's set to 4K for the highest quality.
- Ensure adequate lighting for optimal daytime recording.
