## SETUP GUIDE

### 1. Powering On the Camera

1. Connect the Type-C power cord to the camera's power input port.
2. Plug the power adapter into a standard electrical outlet.
3. The camera will power on and initiate its startup sequence. Wait for the indicator light to flash, indicating it's ready for pairing.

## 2. App Installation and Account Creation

1. Download the official PHANSATIM app from your smartphone's app store (iOS or Android).
2. Open the app and follow the on-screen instructions to create a new user account or log in if you already have one.

## 3. Connecting to Wi-Fi

1. In the app, tap the "+" icon to add a new device.
2. Select your camera model from the list of available devices.
3. Follow the app's instructions to connect the camera to your home Wi-Fi network. Ensure your Wi-Fi network is 2.4GHz or 5GHz compatible.
4. Scan the QR code displayed on your phone with the camera lens if prompted.
5. Once connected, the camera's indicator light will change, and the app will confirm successful pairing.

## 4. Mounting the Camera

The camera offers versatile mounting options:

- **Desktop Placement:** Place the camera on a flat, stable surface.
- **Wall Mounting:** Use the provided screws to secure the camera base to a wall.
- **Ceiling Mounting:** Use the provided screws to secure the camera base to the ceiling.

# Two Storage Methods

 **Cloud Storage**

 **TF Card(Up to 128GB)**

## OPERATING INSTRUCTIONS

### Live View and Controls

Once connected, open the app to access the live feed from your camera. The app interface provides various controls:

- **Motion Detection:** Enable or disable motion detection alerts.
- **Two-Way Audio (Intercom):** Tap the intercom icon to speak through the camera's speaker.
- **Siren:** Activate the camera's siren to deter intruders.
- **Night Vision:** Manually switch between day and night vision modes, or set to auto.
- **Screenshot:** Capture a still image from the live feed.
- **Record:** Manually start or stop video recording.
- **Activity Zone:** Define specific areas for motion detection.

# Smooth Two-Way Audio

*Listen and talk to your loved ones anytime you like.*

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Avoid abrasive cleaners or solvents.
- **Firmware Updates:** Regularly check the app for available firmware updates to ensure optimal performance and security.
- **Power Supply:** Ensure the camera is connected to a stable power source.
- **SD Card Management:** If using an SD card, periodically check its status and format it through the app if necessary to maintain recording quality.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Camera not powering on	Power cable loose, power adapter faulty, no power at outlet.	Check power connections. Try a different outlet. Ensure power adapter is functioning.
Unable to connect to Wi-Fi	Incorrect Wi-Fi password, camera too far from router, incompatible Wi-Fi band (e.g., 5GHz only for 2.4GHz camera), network interference.	Verify Wi-Fi password. Move camera closer to router. Ensure router supports 2.4GHz and 5GHz (camera supports both). Restart router and camera.
No motion detection alerts	Motion detection disabled in app, sensitivity too low, activity zone not set correctly.	Enable motion detection in app. Adjust sensitivity settings. Configure activity zones.
Poor video quality	Dirty lens, low network bandwidth, camera resolution settings.	Clean the camera lens. Ensure stable Wi-Fi connection. Check resolution settings in the app.
Two-way audio not working	Microphone/speaker disabled in app, volume too low, network issues.	Check audio settings in the app. Adjust volume. Ensure stable network connection.
