qirita C17

User Manual: 64" Auto Face Tracking Tripod

Brand: qirita | Model: C17

PRODUCT OVERVIEW

The qirita C17 64" Auto Face Tracking Tripod is a versatile and intelligent device designed for content creators, live streamers, and anyone looking to capture stable, dynamic photos and videos. It combines the functionality of a selfie stick, a stable quadrapod, and an AI-powered face tracking gimbal, ensuring you always stay in frame.

WHAT'S IN THE BOX

- 64" Auto Face Tracking Tripod (Model C17)
- Detachable Wireless Remote Control

- User Manual
- CR2032 Battery (pre-installed in remote)

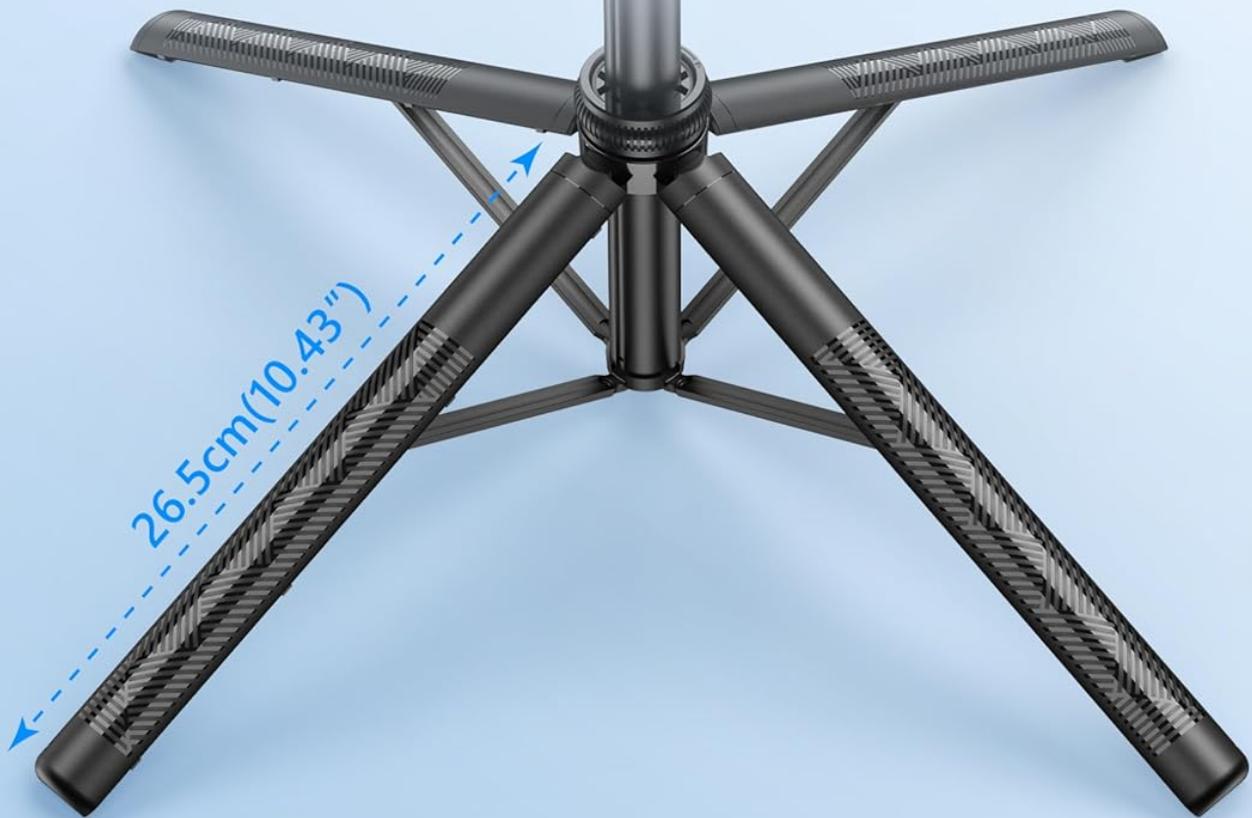

SETUP GUIDE

1. Unfolding the Tripod

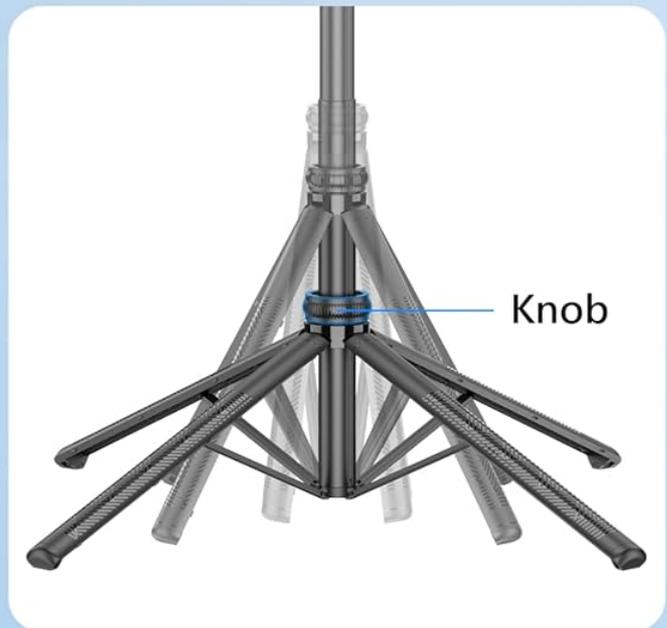

To deploy the tripod, gently pull the legs outwards from the base. The robust four-leg design with an umbrella-like skeleton structure provides exceptional stability. Ensure all four legs are fully extended and locked into place for maximum stability.

Large & Stable Quadrapod Base

Umbrella keel structure design for more stable support

2. Attaching Your Device

The universal phone holder can be adjusted to accommodate devices from 2.5 to 3.7 inches wide. Gently expand the phone clip and insert your smartphone. The tripod also features a standard 1/4" screw mount, allowing compatibility with most cameras, action cameras, and fill lights.

Widely Compatible

Compatible with mobile phones, camera, fill light

For iPhone/Samsung/Android

2.53"/6.42cm

2.81"/7.15cm

3.06"/7.76cm

3"/7.62cm

3.07"/7.81cm

2.5~3.7in
(6.5~9.5cm)

3. Pairing the Remote Control

The tripod comes with a detachable wireless remote control. To pair, ensure the remote is powered on (check battery if needed). Activate Bluetooth on your smartphone and search for "Selfie TK" or a similar device name. Select it to connect. The remote allows you to start/stop recording and take photos from a distance of up to 33 feet (10 meters).

OPERATING INSTRUCTIONS

AI Intelligent Face Tracking

The C17 tripod features an AI smart system that automatically identifies and tracks faces or bodies, rotating 360° to keep

you in frame. No app is required for this function.

- **Start Tracking:** Make the "OK" gesture (thumb and forefinger forming a circle) towards the camera.
- **Pause Tracking:** Make the "Palm" gesture (open hand, palm facing camera) towards the camera.

Height Adjustment

The six telescopic rods, made of durable aluminum alloy, allow the tripod to be adjusted from a compact 17 inches (360mm) to an extended height of 64 inches (1635mm). This flexibility supports various shooting angles and scenarios, from low-angle shots to overhead views.

Easily Adjust the Height

Perfect for groups shoots to capture a broader view

Figure 6: Adjusting the tripod height for optimal shooting angles.

Rotation and Angles

The tripod supports 360° rotation for both horizontal and vertical shooting. It also allows for elevated/overhead shots and front/back shots, providing a wide range of creative possibilities.

Support Any Angles Shooting

Wide rotation range inspires your creativity

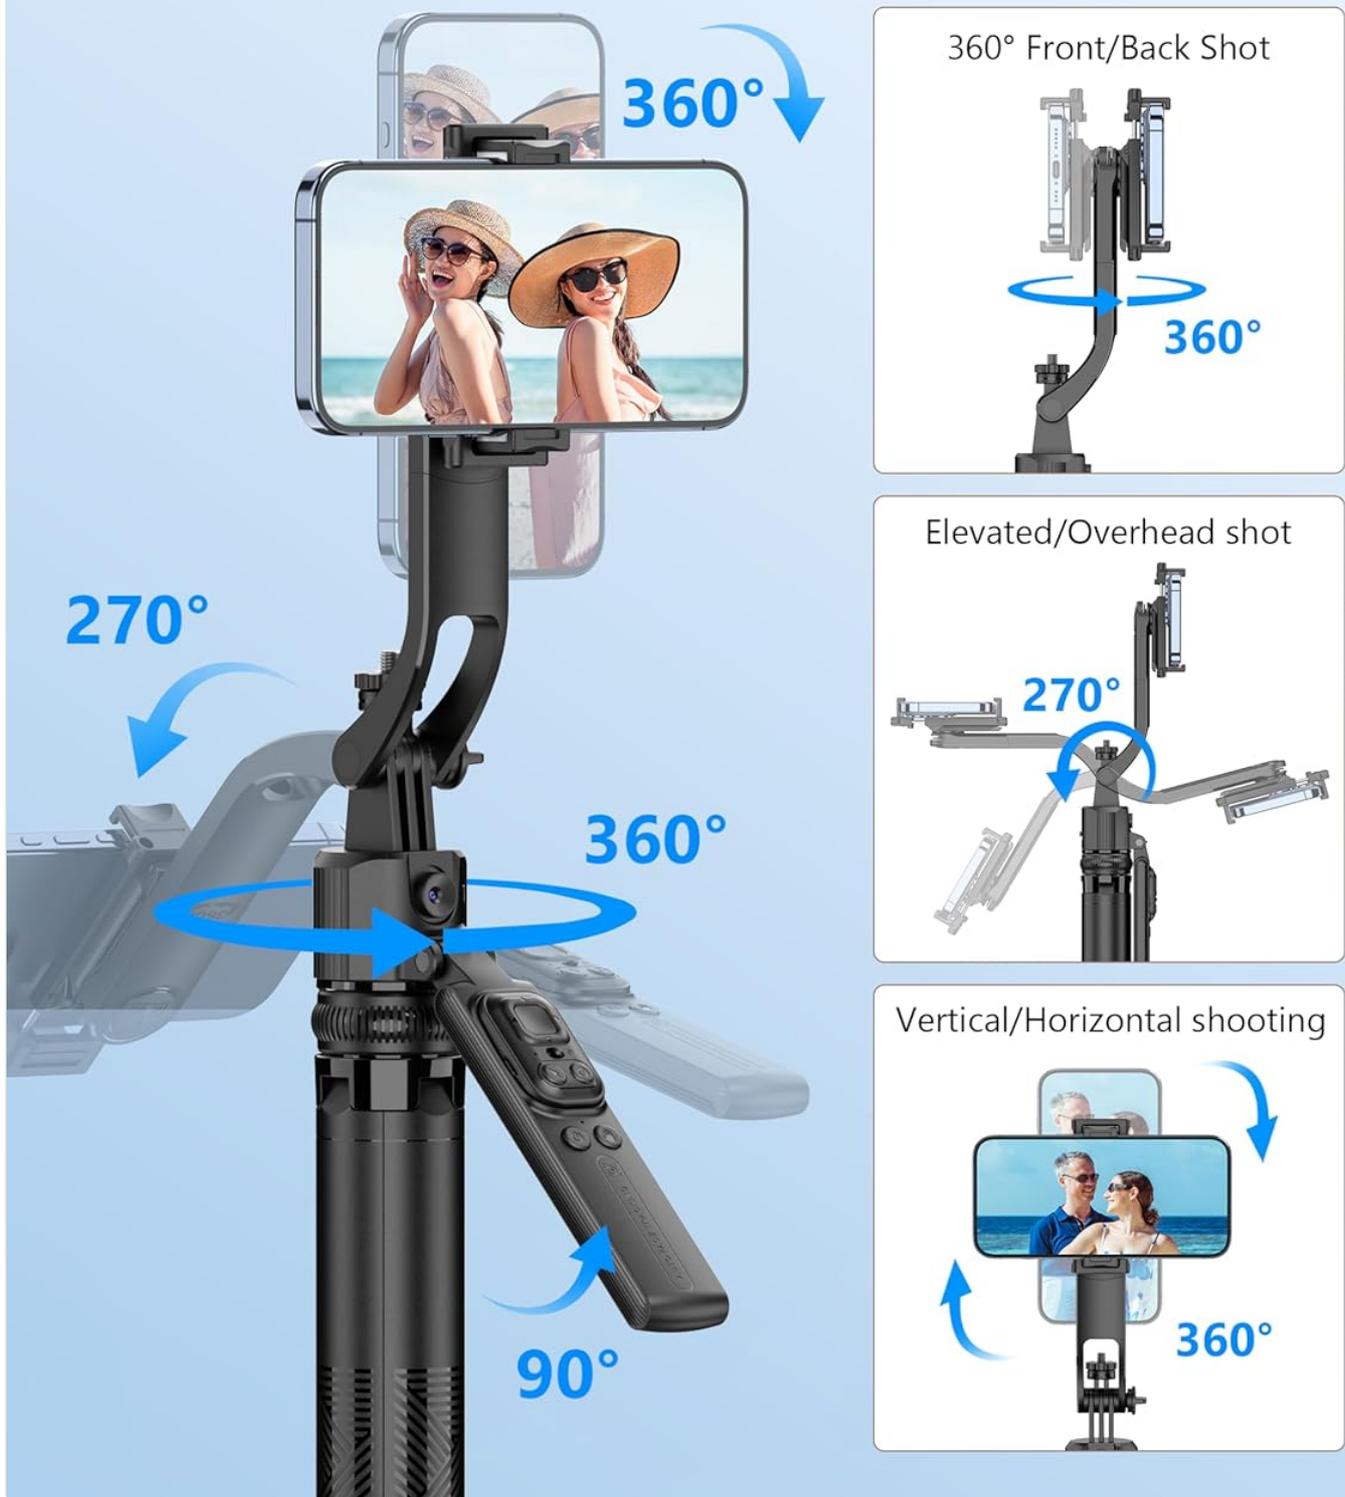

Figure 7: Versatile shooting angles supported by the tripod.

Selfie Stick Mode

When folded, the device functions as a convenient handheld selfie stick. The balancing handle ensures stable lens movement for smooth recordings.

360° Auto Rotate & No APP Required

Just turn it on easy to use

Figure 8: Using the device as a selfie stick with auto-rotation.

Usage Scenarios

The qirita C17 tripod is ideal for a variety of uses, including:

- Selfies and group photos

- Adventure travel and vlogging
- YouTube videos and podcasts
- Facebook Live, Facetime, Instagram, and other live streaming platforms

Figure 9: Examples of the tripod's use in group settings and for content creation.

MAINTENANCE

To ensure the longevity and optimal performance of your qirita C17 tripod, follow these maintenance guidelines:

- **Cleaning:** Wipe the surface with a soft, dry cloth. Avoid using abrasive cleaners or solvents that may damage the finish.
- **Storage:** Store the tripod in a cool, dry place away from direct sunlight and extreme temperatures. Ensure it is fully collapsed and the legs are secured before storage.
- **Battery:** If the remote control will not be used for an extended period, consider removing the CR2032 battery to prevent leakage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
AI tracking not working.	Incorrect gesture; insufficient lighting; object obstruction.	Ensure clear "OK" or "Palm" gesture is made. Verify adequate lighting. Remove obstructions.
Remote control not pairing.	Remote battery low/dead; Bluetooth not enabled on phone; remote not in pairing mode.	Replace CR2032 battery. Enable Bluetooth on your device. Ensure remote is powered on and discoverable.
Tripod unstable.	Legs not fully extended/locked; uneven surface.	Fully extend and lock all four legs. Place on a flat, stable surface.
