PRODUCT FEATURES

- **46-Inch Adjustable Handle:** Ensures a comfortable, no-bend weeding experience, ideal for users with back issues or those seeking ergonomic gardening tools.
- **Deeper 4 Cast Steel Claws:** Effectively removes deep-rooted weeds and works seamlessly in compacted soil, designed to resist bending or breaking.
- **Patented Foot Pedal:** Provides extra leverage for effortless and efficient weed removal, even in tough soil conditions.
- **Durable & Ergonomic Construction:** Built with a thickened stainless steel handle, cast steel claws, and a sturdy pedal, ensuring lightweight yet durable performance and reducing strain.
- **Versatile Use:** Suitable for various weed types and soil conditions, making it a valuable tool for gardening enthusiasts, homeowners, and professional landscapers.

Patented Foot Pedal Design

Reduce Breakage Up To 80%

- Cast steel four claw head
- Tough, serrated, root-grabbing teeth
- Thickened stainless steel handle design
- Extra-long for easy stand-up use
- Durable, lightweight construction
- Safe for the environment, kids & pets
- Foot pedal for enhanced performance

SETUP

The GOXAWEE Weed Puller Tool requires minimal assembly. Follow these steps to set up your tool:

1. **Connect the Handle Sections:** The handle comes in three sections. Align the threads and screw them together securely to form the full 46-inch handle.
2. **Attach the Head:** Pair the two parts of the head, noting the pairing of screw holes (A & B).
3. **Insert Bolts:** Insert the supplied hexagon bolts through the aligned holes.
4. **Snap Head of Bolt:** Snap the head of the hexagon bolt into place.
5. **Secure with Nut:** Turn the product upside down and place the nut onto the bolt.
6. **Tighten:** Use the provided wrench to tighten the nut until the head is firmly secured.

Installation Steps

Image: Visual guide illustrating the six steps for assembling the weed puller, from pairing parts to tightening the nut with the provided wrench.

OPERATING INSTRUCTIONS

Using the GOXAWEE Weed Puller is a simple three-step process:

1. **Step 1: Center Over Weed:** Position the claws directly over the weed you wish to remove. Ensure the claws encompass the base of the weed.
2. **Step 2: Push Downward:** Firmly push the tool downward into the soil using your foot on the pedal. The claws will penetrate the soil around the weed's roots.
3. **Step 3: Pull Handle:** Once the claws are firmly in the soil, pull the handle in the direction of the pedal. This action will leverage the weed out of the ground, root and all.

For best results, ensure the soil is not excessively dry or hard. Water the area if necessary to soften the soil before weeding.

Weeding is a Simple Three-Step Process

STEP1

Center Over Weed

STEP2

Push Downward

STEP3

Pull handle in the direction of pedal

Image: A visual demonstration of the three-step weeding process: 1. Center over weed, 2. Push downward with foot, 3. Pull handle to extract the weed.

Uproot Weed Effortlessly

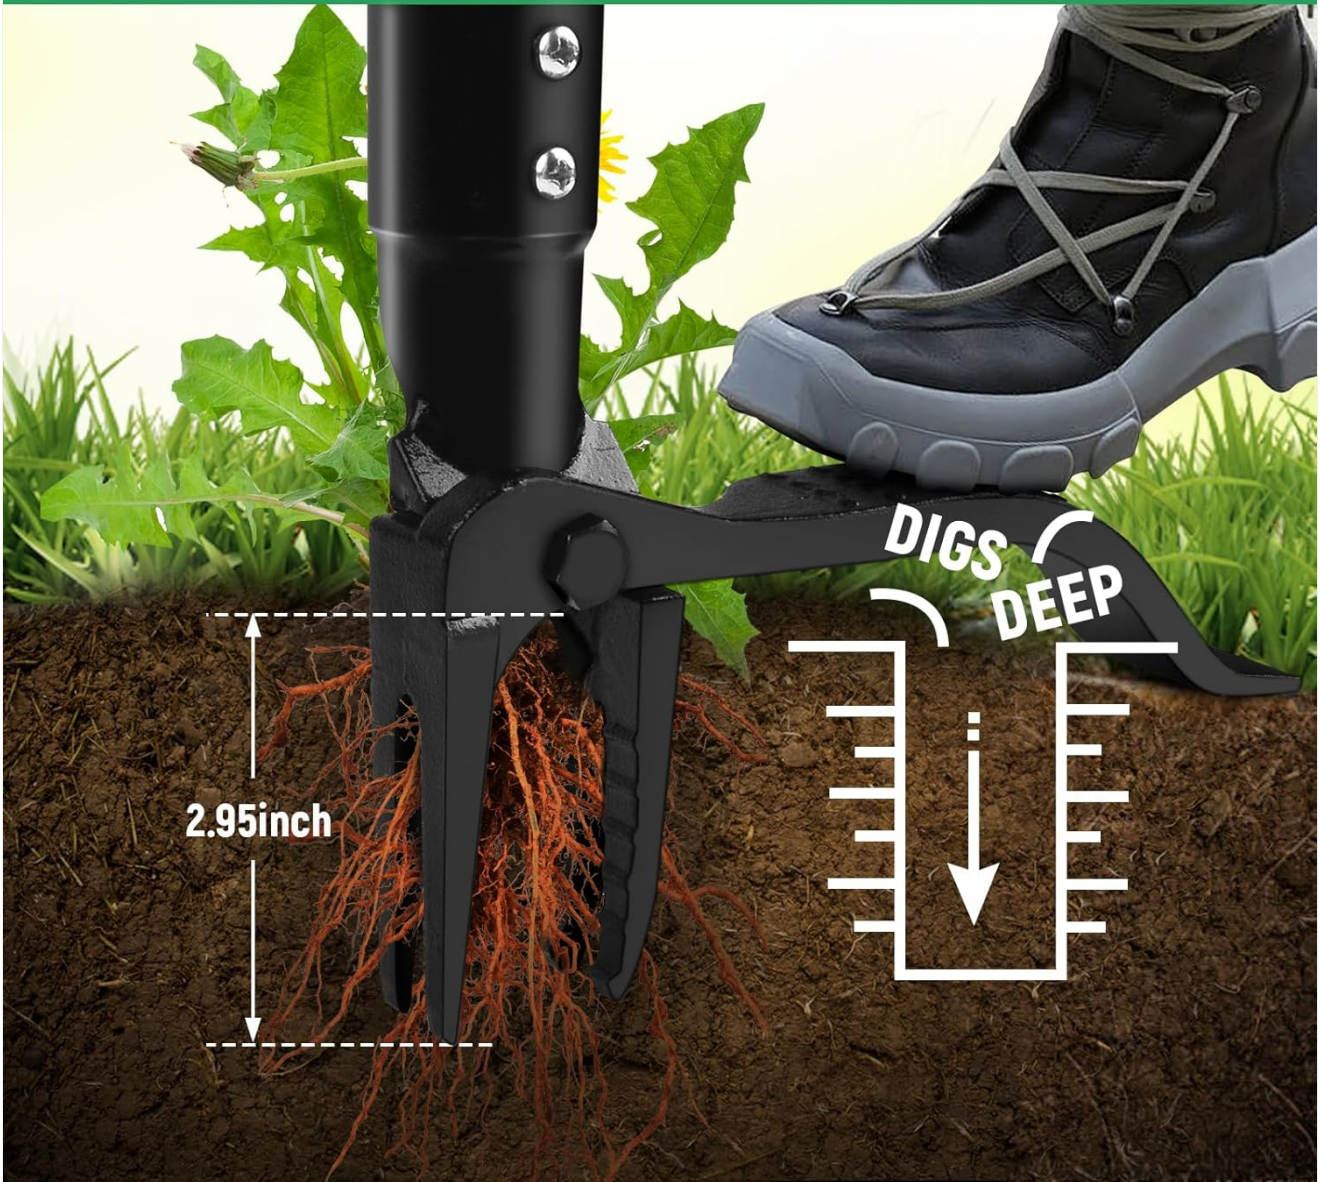

Image: Illustration demonstrating how the weed puller's claws dig deep into the soil (2.95 inches) to effectively extract the entire root system of a weed.

Conquers All Kinds Of Weeds

Image: The weed puller shown effectively removing different types of weeds, including dandelion, crabgrass, and thistles, highlighting its versatility.

MAINTENANCE

To ensure the longevity and optimal performance of your GOXAWEE Weed Puller Tool, follow these maintenance guidelines:

- **Cleaning:** After each use, remove any soil, mud, or plant debris from the claws and handle. A stiff brush or cloth can be used.
- **Drying:** Ensure the tool is completely dry before storing to prevent rust, especially on the steel components.
- **Lubrication:** Periodically apply a light coat of machine oil or silicone spray to the moving parts of the claw mechanism to ensure smooth operation.
- **Storage:** Store the tool in a dry, covered area, away from direct sunlight and extreme temperatures. Hanging it can help prevent bending or damage.
- **Inspection:** Regularly check all bolts and connections for tightness. Tighten any loose fasteners to maintain stability and safety. Inspect the claws for any signs of wear or damage and replace the tool if significant damage is observed.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Weed not coming out completely.	Claws not deep enough; soil too hard; weed too large/deep-rooted.	Push down more firmly. Water the soil before weeding. Try to center the tool more precisely over the weed's base.
Tool feels stiff or difficult to operate.	Accumulation of dirt/debris; lack of lubrication.	Clean the claw mechanism thoroughly. Apply a light lubricant to moving parts.
Handle feels wobbly or loose.	Loose connections between handle sections or head.	Check and tighten all threaded connections and bolts using the provided wrench.
Claws are not gripping the weed effectively.	Incorrect positioning; worn claws (unlikely for new product).	Ensure the claws are centered directly over the weed's base. If claws appear damaged, contact customer support.

SPECIFICATIONS

- **Product Dimensions:** 7 x 16.5 x 3.99 inches
- **Item Weight:** 3.27 pounds
- **Manufacturer:** GOXAWEE
- **Model Number:** G5303-B
- **Handle Length:** Adjustable up to 46 inches
- **Claw Type:** 4-Claw Cast Steel
