#### **Compatible Vehicles:**

- **Chrysler:**

- 2008 - 2010 Chrysler 300
- 2008 - 2017 Chrysler Town & Country

- **Dodge:**

- 2008 - 2012 Dodge Charger
- 2008 - 2012 Dodge Challenger
- 2008 - 2012 Dodge Durango
- 2008 - 2017 Dodge Grand Caravan
- 2009 - 2012 Dodge Journey
- 2008 - 2012 Dodge Ram

Always use a vehicle compatibility tool or consult your vehicle's manual to confirm suitability.

### **3. SETUP AND PROGRAMMING**

**Professional programming is required for this key fob.** This remote cannot be self-programmed by the user. Attempting to program it yourself may result in damage to the key fob or your vehicle's system.

Image 3: Key fob displaying buttons and indicating professional programming requirement.

The package includes a programming card designed to assist you in locating a local locksmith or automotive dealer who can activate the new remote for your vehicle. Please follow these steps:

1. Locate the programming card included with your purchase.
2. Use the information on the card to find a qualified professional (locksmith or dealer) in your area.
3. Schedule an appointment for professional programming of your new key fob.

Ensure the professional confirms the FCC IDs (IYZ-C01C, M3N5WY783X) match your vehicle's requirements.

#### **4. OPERATING INSTRUCTIONS**

Once professionally programmed, your USA Remote key fob will provide the following functions:

- **Lock Button:** Press once to lock all vehicle doors.
- **Unlock Button:** Press once to unlock the driver's door, press twice to unlock all doors.
- **Panic Button:** Press and hold to activate the vehicle's alarm system. Press again to deactivate.

- **Auxiliary Button (e.g., Remote Start/Trunk Release):** The function of this button (often marked with 'x2' or a trunk icon) depends on your vehicle's specific features and programming. Consult your vehicle's owner's manual for details on this function.

Ensure you are within range of your vehicle for the remote functions to operate correctly. Obstructions or interference may affect signal strength.

## 5. MAINTENANCE

### Battery Replacement

The key fob is powered by a small coin-cell battery. If the remote's range decreases significantly or it stops responding, the battery may need replacement. While specific instructions are not provided, most key fobs can be opened carefully using a small flat-head screwdriver to pry apart the casing. Note the battery type (e.g., CR2032) before replacing it. Ensure correct polarity when inserting the new battery.

### Care and Handling

- Avoid exposing the key fob to water or excessive moisture.
- Do not expose the key fob to extreme temperatures (hot or cold).
- Avoid dropping the key fob or subjecting it to strong impacts.
- Keep the key fob away from strong electromagnetic fields, which can interfere with its operation.

## 6. TROUBLESHOOTING

- **Remote Not Responding:**
  - Check the battery. Replace if necessary.
  - Ensure the key fob was professionally programmed correctly. If issues persist after programming, contact the locksmith or dealer who performed the service.
  - Verify you are within operating range of the vehicle.
- **Reduced Range:**
  - Replace the battery.
  - Ensure there are no significant obstructions or sources of interference between the key fob and the vehicle.
- **Intermittent Operation:**
  - This could indicate a low battery or potential interference. Try replacing the battery first.
  - If the issue continues, professional re-programming may be required.

For persistent issues related to programming or functionality, it is recommended to contact USARemote customer support or the professional who programmed your key fob.
