USAGE AND OPERATION

Adjustable Shelves

To adjust a shelf, first remove all items from the shelf. Lift the shelf and reposition the shelf pins into the desired holes along the cabinet sides. Ensure the shelf is level and securely seated on all four pins before placing items back. This allows you to optimize space for different item heights.

Door Operation

The doors are equipped with magnetic catches for easy opening and secure closing. Gently pull the knob to open and push to close until the magnet engages. The bi-directional design means the doors can swing open from either side, depending on how they were installed during assembly.
