Kircuit Kircuit 36V AC/DC Adapter

Kircuit 36V AC/DC Adapter for AFNOP AceVac 11 Vacuum Cleaner User Manual

Model: Kircuit 36V AC/DC Adapter

1. IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before using this product. Failure to follow these instructions may result in electric shock, fire, or serious injury.

- **Indoor Use Only:** This adapter is designed for indoor use in dry locations. Do not expose to rain, moisture, or extreme temperatures.
- **Proper Voltage:** Ensure the power outlet voltage matches the adapter's input specifications (100-240VAC).
- **Avoid Damage:** Do not use the adapter if the cord or plug is damaged. Do not attempt to open or repair the adapter.
- **Unplug When Not in Use:** Disconnect the adapter from the power outlet when not in use or during electrical storms.
- **Ventilation:** Ensure adequate ventilation around the adapter during operation. Do not cover the adapter.
- **Compatibility:** Use this adapter only with compatible devices as specified. Using it with incompatible devices may cause damage.

2. PRODUCT OVERVIEW

The Kircuit 36V AC/DC Adapter is designed to provide reliable power for your AFNOP AceVac 11 cordless stick vacuum cleaner. It converts standard AC wall power to the DC power required by your device, enabling operation and battery charging.

Figure 1: Kircuit 36V AC/DC Adapter. This image displays the adapter unit with its input specifications and the attached output cable ending in a barrel connector.

This adapter features built-in safety protections including Over Voltage Protection (OVP), Over Current Protection (OCP), and Short Circuit Protection (SCP) to safeguard your device.

3. SETUP AND CONNECTION

1. **Verify Compatibility:** Ensure your device is an AFNOP AceVac 11 cordless stick vacuum cleaner. This adapter is specifically designed for this model.
2. **Connect to Device:** Insert the barrel connector of the adapter's output cable firmly into the charging port of your AFNOP AceVac 11 vacuum cleaner.
3. **Connect to Power Outlet:** Plug the adapter's AC prongs into a standard 100-240VAC wall outlet.

Figure 2: Adapter connected to a power strip. This image shows the Kircuit adapter plugged into a multi-outlet power strip, demonstrating a typical connection scenario.

The device should now begin to operate or charge its battery. Refer to your vacuum cleaner's manual for specific charging indicators.

4. OPERATING INSTRUCTIONS

Once connected, the adapter provides continuous power to your AFNOP AceVac 11 vacuum cleaner. If the vacuum's battery is depleted, the adapter will initiate the charging process.

- **Charging:** The adapter supplies 36V DC to charge the vacuum's 29.6V Li-ion battery. Note that the 29.6V refers to the vacuum's battery voltage, not the charger's output voltage.
- **Battery Life:** Rechargeable batteries have a finite lifespan, typically 1 to 3 years. If your vacuum's battery is old or faulty, it may not accept a charge, which is a battery issue, not an adapter malfunction.
- **Continuous Use:** The adapter can be used to power the vacuum directly while plugged in, or to charge the battery for cordless operation.

5. MAINTENANCE AND CARE

To ensure the longevity and proper function of your Kircuit AC/DC Adapter, follow these simple maintenance guidelines:

- **Cleaning:** Disconnect the adapter from the power outlet and the device before cleaning. Wipe the adapter with a dry, soft cloth. Do not use liquid cleaners or solvents.
- **Storage:** Store the adapter in a cool, dry place when not in use. Avoid wrapping the cable too tightly around the adapter to prevent damage.

- **Cable Inspection:** Periodically inspect the power cord and connector for any signs of damage, such as fraying, cuts, or bent pins. If damage is observed, discontinue use and replace the adapter.

Figure 3: Adapter with cable length indicated. This image highlights the adapter and its approximately 6.5-foot long power cable.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Adapter not providing power/device not charging.	Loose connection. Faulty power outlet. Damaged adapter or cable. Vacuum cleaner battery is old or faulty.	Ensure all connections are secure. Test the power outlet with another device. Inspect the adapter and cable for damage. If damaged, replace the adapter. If the vacuum's battery is old, it may need replacement (refer to vacuum manual).

Problem	Possible Cause	Solution
Adapter feels warm during use.	Normal operation.	A slight warmth is normal. Ensure adequate ventilation around the adapter. If it becomes excessively hot, disconnect immediately and contact support.

7. SPECIFICATIONS

Brand	Kircuit
Model	36V AC/DC Adapter
Input Voltage	100-240VAC, 50/60Hz, 0.3A
Output Voltage	36V DC
Output Current	0.5A (500mA)
Output Power	18W
Connector Type	Barrel Connector
Cord Length	Approximately 6.5 ft (2 meters)
Safety Features	OVP (Over Voltage Protection), OCP (Over Current Protection), SCP (Short Circuit Protection)
Compatible Devices	AFNOP AceVac 11 Cordless Stick Vacuum Cleaner
Manufacturer	Shenzhen Waweis Technology Co., Ltd

8. WARRANTY AND SUPPORT

Information regarding product warranty and customer support was not provided in the available product data. Please refer to the seller's or manufacturer's website for specific warranty terms and contact information.

For further assistance, you may contact the seller directly through the platform where the product was purchased.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
