3. OPERATING INSTRUCTIONS

Using NESCAFÉ DOLCE GUSTO pods is a straightforward process. Follow these steps to brew your favorite beverage:

3.1 Brewing a Beverage

1. **Power On:** Turn on your NESCAFÉ DOLCE GUSTO coffee machine and wait for it to heat up (indicator light will typically turn solid green).
2. **Insert Pod:** Open the capsule holder of your machine. Insert one NESCAFÉ DOLCE GUSTO pod into the holder. Ensure it is seated correctly.
3. **Close Holder:** Close the capsule holder securely.
4. **Select Water Volume:** Adjust the water volume selector on your machine according to the recommendation on the pod packaging. Some machines have manual levers, while others have automatic volume settings.
5. **Brew:** Press the hot or cold water button (depending on the beverage type) to start the brewing process. The machine

will dispense the beverage into your cup.

- Dispose Pod:** Once brewing is complete, open the capsule holder and carefully remove the used pod. Dispose of it properly.

For beverages requiring two pods (e.g., Cappuccino, Latte Macchiato), follow the instructions on the packaging, typically brewing the milk pod first, then the coffee pod.

4.1 Machine Cleaning

- Regularly clean the drip tray and capsule holder of your machine.
- Descale your machine periodically as recommended by the machine's manufacturer to prevent mineral buildup and ensure consistent performance.

- Wipe down the exterior of your machine with a damp cloth.

After use, dispose of the empty pods responsibly. NESCAFÉ DOLCE GUSTO offers an optional Podback recycling program for plastic pods. Check the customized tab on the product page or the official NESCAFÉ DOLCE GUSTO website for details on how to obtain free plastic pod recycling bags and participate in the program.
