

VITCOCO VITCOCO Rechargeable Ear Wax Removal Kit

VITCOCO Rechargeable Ear Wax Removal Kit User Manual

Model: B0DFH7BV6P | Brand: VITCOCO

1. INTRODUCTION

The VITCOCO Rechargeable Ear Wax Removal Kit is designed to provide a safe, effective, and convenient solution for ear hygiene. This device utilizes a gentle water irrigation system with multiple cleaning modes to help remove earwax buildup, promoting better ear health and hearing clarity. Its rechargeable battery and waterproof design ensure ease of use and maintenance.

This manual provides comprehensive instructions for the proper setup, operation, maintenance, and troubleshooting of your VITCOCO Ear Wax Removal Kit. Please read this manual thoroughly before first use to ensure safe and optimal performance.

2. SAFETY INFORMATION

Please observe the following safety precautions to prevent injury or damage to the device:

- Do not use if you have ear infections, perforated eardrums, ear tubes, or any other ear injury or condition. Consult a medical professional if unsure.
- Always use lukewarm water (approximately $37^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / $98.6^{\circ}\text{F} \pm 3.6^{\circ}\text{F}$). Water that is too hot or too cold can cause dizziness or discomfort.
- Do not insert the nozzle too deeply into the ear canal. The flared design of the nozzles is intended to prevent over-insertion.
- If you experience pain, dizziness, or any unusual sensation during use, stop immediately and consult a medical professional.
- Keep out of reach of children. Adult supervision is required if used by or on children.
- Ensure the charging port is dry before charging.
- This device is for personal use and should not be shared without proper sterilization of the ear tips.

4. PRODUCT OVERVIEW AND FEATURES

The VITCOCO Ear Wax Removal Kit is equipped with advanced features for effective and comfortable ear cleaning:

- **4 Ear Cleaning Modes:** Choose from Normal, Gentle, Pulse, and Powerful modes to suit your needs.
- **Safe and Effective Nozzles:** Includes 5 five-hole nozzles for a gentler, wider rinse and 5 three-hole nozzles for a more concentrated stream. Flared design prevents over-insertion.
- **Long Battery Life:** 2000 mAh battery provides up to 12 hours of continuous use in mild mode.
- **IPX7 Waterproof:** The entire housing is waterproof, allowing for safe use in the shower and easy cleaning.
- **200ml Water Tank:** Sufficient capacity for a thorough cleaning session without frequent refills.
- **Automatic Shut-off:** Device switches off automatically after 10 minutes of inactivity to conserve battery.

4 Cleaning Modes

Safe, stable and effective ear irrigation system

Power Button

Long press: Power on/off
Short press: Pause

Mode Button

Short press change modes

Normal

Gentle yet effective for everyday cleaning

Pulse

Alternating wash for a unique and thorough clean

Soft

Deep cleansing for a refreshed feel

Strong

Powerful wash to tackle the toughest earwax build-up

Image: Illustration of the two types of replaceable nozzles included: the 1-hole nozzle for concentrated stream and the 5-hole nozzle for a broader, gentler spray.

5. SETUP INSTRUCTIONS

Follow these steps to prepare your device for use:

1. **Charge the Device:** Before first use, fully charge the device using the provided Type-C charging cable. The red LED will flash when the battery is low.
2. **Check Waterproof Insert:** Ensure the waterproof insert for the charging port is securely in place before filling with water.
3. **Prepare Water:** Disassemble the water tank from the main unit. Fill the water tank with lukewarm water (approximately $37^{\circ}\text{C} \pm 2^{\circ}\text{C}$ / $98.6^{\circ}\text{F} \pm 3.6^{\circ}\text{F}$). Do not use hot or cold water.
4. **Install Nozzle:** Select your desired ear tip (three-hole or five-hole) and insert it onto the device's nozzle. Rotate the nozzle to ensure it is securely installed.
5. **Assemble the Unit:** Reattach the filled water tank to the main device, ensuring it is securely fastened.

6. OPERATING INSTRUCTIONS

Once the device is set up, follow these steps for ear cleaning:

1. **Initial Use:** Press and hold the power button to turn on the device.
2. **Select Mode:** Short press the mode button (M) to cycle through the four cleaning modes:
 - *Normal:* Gentle yet effective for everyday cleaning.
 - *Soft:* Deep cleaning for a refreshed feel, suitable for sensitive ears.
 - *Pulse:* Alternating wash for a unique and thorough clean.
 - *Strong:* Powerful wash to tackle stubborn earwax buildup.
3. **Positioning:** Hold the ear basin under your ear to catch the water and dislodged earwax. Position the nozzle at the entrance of your ear canal, ensuring it does not go too deep.
4. **Gentle Cleaning:** Press the power button to start the water flow. Move the nozzle gently around the ear canal entrance. Do not force the nozzle or water into the ear.
5. **Pause/Stop:** Short press the power button to pause the water flow. Long press to turn off the device.
6. **Repeat if Necessary:** If needed, refill the water tank and repeat the process for the same ear or switch to the other ear.

7. MAINTENANCE AND CLEANING

Proper maintenance ensures the longevity and hygiene of your device:

- **After Each Use:**
 - Empty any remaining water from the tank.
 - Rinse the water tank and ear tips thoroughly with clean water.
 - Clean the ear basin.
 - Use the provided ear spoon brush to clean the ear spoons after use.
- **Device Cleaning:** The main unit is IPX7 waterproof and can be rinsed under running water. Ensure the charging port cover is sealed. Do not submerge the device for extended periods.
- **Drying:** Allow all components to air dry completely before reassembling or storing.
- **Storage:** Store the device and accessories in a clean, dry place away from direct sunlight and extreme temperatures.

8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Device does not turn on.	Low battery.	Charge the device fully using the Type-C cable.
No water flow or weak water flow.	Water tank empty or not properly assembled. Nozzle clogged.	Refill water tank and ensure it's securely attached. Check nozzle for blockages and clean if necessary.
Red LED flashing.	Low battery indicator.	Recharge the device.
Device automatically shuts off.	Inactivity for 10 minutes.	This is a normal power-saving feature. Turn the device back on to continue use.

9. SPECIFICATIONS
