**Note on Modularity:** While the system is modular, the provided components are typically designed for a single, interconnected structure. Creating multiple completely independent smaller units may require additional connectors not included in the standard package. Refer to the included assembly guide for recommended configurations.

#### 1.4 Attaching the Coat Rack

The metallic coat rack can be attached to the side of the assembled shoe rack. Locate the designated attachment points and secure the hook firmly. This provides a convenient spot for hanging bags, belts, umbrellas, or other accessories.

### 3. MAINTENANCE

---

To ensure the longevity and cleanliness of your InnovaGoods Modular Portable Shoe Rack, follow these simple maintenance guidelines:

- **Cleaning:** Wipe down the panels and connectors regularly with a damp cloth. For stubborn dirt, a mild soap solution can be used. Avoid abrasive cleaners or harsh chemicals, as these may damage the material.
- **Ventilation:** The doors are designed with ventilation holes. Ensure these holes remain clear of obstructions to allow proper air circulation and prevent moisture buildup.
- **Stability Check:** Periodically check all connections to ensure they remain firm. If any part feels loose, gently tap it back into place with the wooden hammer or by hand.
- **Moisture Resistance:** The rack is designed to be resistant to humidity, making it suitable for various environments. However, avoid prolonged exposure to excessive moisture or direct water contact.

### 4. TROUBLESHOOTING

---

Here are solutions to common issues you might encounter:

- **Problem:** The rack feels unstable or wobbly.  
**Solution:** Ensure all panels are fully inserted into the connectors. Use the wooden hammer to gently tap each connection point until it is snug and secure. Check that the rack is placed on a flat, even surface.
- **Problem:** Doors do not close properly or are difficult to open.  
**Solution:** Verify that the door panels are correctly oriented and attached to their hinges. Ensure no items inside the compartment are obstructing the door's movement.
- **Problem:** Odors accumulate inside compartments.  
**Solution:** Ensure the ventilation holes on the doors are not blocked. Regularly clean the compartments. Consider using shoe deodorizers if necessary.
- **Problem:** Difficulty creating multiple independent smaller units from the provided components.
