

## LPkeybd LPkeybd

# LPkeybd 9009 Low Profile Keycaps Instruction Manual

Model: LPkeybd

## 1. PRODUCT OVERVIEW

The LPkeybd 9009 Low Profile Keycaps set is designed to enhance the aesthetic and tactile experience of custom mechanical keyboards. This set features a unique low-profile design and durable PBT material, offering a comfortable and long-lasting typing experience.

### Key Features:

- **130+ Keys:** Comprehensive set covering various keyboard layouts (40%, 60%, 65%, 75%, TKL, 100%, and custom keyboards).
- **Low Profile Design:** Half the height of traditional Cherry Profile keycaps, increasing finger touch area for improved comfort and reduced typing effort.
- **PBT Material:** Constructed from high-quality PBT plastic, known for its durability and resistance to shine over time.
- **Doubleshot Molding & Dip-Dyeing:** Ensures legends are long-lasting and colors remain vibrant.
- **ANSI Layout:** Standard layout for broad compatibility.

## 2. SETUP AND INSTALLATION

This product includes only the keycap set. A mechanical keyboard is required and is not included.

### Compatibility:

- **Switch Type:** Compatible with most cross-shaped switches, including Cherry MX, Gateron, Kailh, TTC, KTT, and OUEMU.
- **Keyboard Layouts:** Suitable for most brands or customized 61/87/104/108 ANSI layout mechanical keyboards.

### Installation Steps:

1. **Prepare Your Keyboard:** Ensure your mechanical keyboard is powered off and disconnected from your computer.
2. **Remove Existing Keycaps (if applicable):** Use a keycap puller (not included) to carefully remove any existing keycaps from your keyboard. Gently pull straight up to avoid damaging the switch stem.
3. **Identify Keycap Types:** The set includes various keycap sizes and profiles. Refer to Image 2.1 and 2.2 to

identify the correct keycap for each switch position. Pay attention to the stabilizer keys (Spacebar, Shift, Enter, Backspace) which may require specific keycaps.

4. **Install New Keycaps:** Align the cross-shaped stem of the keycap with the switch stem on your keyboard. Press down firmly and evenly until the keycap is seated securely. Do not force the keycap if it does not align.
5. **Test Functionality:** Once all keycaps are installed, reconnect your keyboard and test each key to ensure proper function and seating.

### 3. USAGE AND ERGONOMICS

The LPKeybd 9009 Low Profile Keycaps are designed for an optimized typing experience. Their reduced height compared to standard keycaps allows for a flatter hand position, which can contribute to improved ergonomics and reduced wrist strain during extended use. The PBT material provides a textured, non-slippery surface for consistent key presses.

## 4. MAINTENANCE AND CARE

---

To ensure the longevity and appearance of your LPkeybd 9009 Low Profile Keycaps, follow these maintenance guidelines:

- **Regular Cleaning:** Dust and debris can accumulate between keycaps. Use a soft brush or compressed air to remove loose particles.
- **Deep Cleaning:** For more thorough cleaning, carefully remove the keycaps using a keycap puller. Wash them in lukewarm water with a mild soap. Rinse thoroughly and allow them to air dry completely before re-installing.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, solvents, or harsh chemicals, as these can damage the PBT material and legends.
- **Storage:** If storing keycaps, keep them in a cool, dry place away from direct sunlight to prevent discoloration or warping.

## 5. TROUBLESHOOTING

---

If you encounter any issues with your keycaps, refer to the following common problems and solutions:

- **Keycap Does Not Fit:**

Ensure the keycap's stem aligns correctly with your keyboard's switch stem. Verify your keyboard uses cross-shaped switches (e.g., Cherry MX style). If the keycap is for a stabilizer, ensure the stabilizer inserts are properly aligned.

- **Color Appears Different:**

The color tone of the keycaps may appear slightly different due to lighting conditions, monitor settings, or photographic effects. This is normal and not indicative of a defect.

- **Keycap Feels Loose:**

Gently remove the keycap and re-install it, ensuring it is pressed down firmly and evenly onto the switch stem. If the issue persists, inspect the switch stem for any damage.

## 6. SPECIFICATIONS

<b>Material</b>	PBT (Polybutylene Terephthalate)
<b>Number of Keys</b>	130+
<b>Keycap Profile</b>	Low Profile
<b>Layout</b>	ANSI
<b>Switch Compatibility</b>	Cross-shaped switches (e.g., Cherry MX, Gateron, Kailh, TTC, KTT, OUTEMU)
<b>Keyboard Compatibility</b>	Most 61/87/104/108 ANSI layout mechanical keyboards
<b>Package Dimensions</b>	1.18 x 0.79 x 0.39 inches
<b>Item Weight</b>	12.3 ounces
<b>Model Number</b>	LPkeybd
<b>ASIN</b>	B0DFM45XHR
<b>Included Components</b>	Keycap Set
