1Mii SafeFly Min+

1Mii SafeFly Min+ Bluetooth Transmitter and Receiver User Manual

Model: SafeFly Min+

1. INTRODUCTION

The 1Mii SafeFly Min+ is a versatile 2-in-1 Bluetooth audio adapter designed to enhance your audio experience. It functions as both a Bluetooth transmitter (TX) and a Bluetooth receiver (RX), allowing you to wirelessly stream audio from non-Bluetooth devices to Bluetooth headphones/speakers, or to connect your Bluetooth-enabled phone/tablet to wired audio systems.

This manual provides detailed instructions for setting up, operating, and maintaining your SafeFly Min+ device. Please read it carefully before use.

5. TRANSMITTER (TX) MODE OPERATION

In TX mode, the SafeFly Min+ transmits audio from a non-Bluetooth source to your Bluetooth headphones or speakers.

5.1. Connecting to an Audio Source

1. Slide the switch to the **TX** position.
2. Connect the 3.5mm audio jack of the SafeFly Min+ to the audio output port of your device (e.g., airplane entertainment system, TV, gym equipment).
3. For airplane use, if the audio jack is a dual-prong type, use the included Dual Prong Airplane Adapter.

5.2. Pairing with Bluetooth Headphones/Speakers

1. Ensure the SafeFly Min+ is in TX mode and powered on. The OLED screen will display "Searching...".

2. Put your Bluetooth headphones or speaker into pairing mode. Refer to your audio device's manual for specific instructions.

3. The SafeFly Min+ will automatically search for and connect to nearby Bluetooth devices. The OLED screen will show the connected device's name (e.g., "BT Headphone 1").

4. If multiple devices are found, use the < and > buttons to navigate and the OK button to select your desired device.

5.3. Dual Link Functionality

The SafeFly Min+ supports connecting to two Bluetooth headphones/speakers simultaneously.

1. After successfully pairing the first device (e.g., "BT Headphone 1"), put your second Bluetooth device into pairing mode.

2. Press the Multi-function (OK) button twice quickly on the SafeFly Min+ to initiate pairing for the second device. The OLED screen will show "Searching B...".

3. Once connected, the OLED screen will display both connected devices (e.g., "BT Headphone 1" and "BT Headphone 2").

6. RECEIVER (RX) MODE OPERATION

In RX mode, the SafeFly Min+ receives audio from your Bluetooth-enabled phone/tablet and outputs it to a wired audio system.

6.1. Connecting to a Wired Audio System

1. Slide the switch to the **RX** position.

2. Connect the 3.5mm audio jack of the SafeFly Min+ to the AUX input port of your wired audio system (e.g., car stereo, home stereo, wired headphones/speakers).

3. If your wired system has a female 3.5mm input, use the included 3.5mm to 3.5mm Female Adapter.

6.2. Pairing with a Bluetooth Device (Phone/Tablet)

1. Ensure the SafeFly Min+ is in RX mode and powered on. The OLED screen will display "Searching...".
2. On your phone or tablet, enable Bluetooth and search for new devices.
3. Select "1Mii SafeFly Min+" from the list of available devices to pair.
4. Once connected, the OLED screen will display the name of your paired device (e.g., "A: Phone").

7. VOLUME CONTROL AND RESET FUNCTION

7.1. Volume Adjustment

- Use the < button to decrease the volume.
- Use the > button to increase the volume.
- The OLED screen will display the current volume level.

7.2. Reset Function

If you encounter connection issues or unexpected behavior, use the independent "RESET" button. Pressing this button will clear all previous pairing records and restart the device, often resolving compatibility or reconnection problems.

9. SAFETY INFORMATION

To ensure safe operation and prolong the life of your device, please observe the following:

- Use only authorized chargers and batteries.
- Keep the device away from water, moisture, and extreme temperatures.
- Do not open, disassemble, or attempt to repair the device yourself. This may void the warranty and pose safety risks.
- Avoid dropping or subjecting the device to strong impacts.

10. TROUBLESHOOTING

If you encounter issues with your SafeFly Min+, try the following solutions:

- **Device not powering on:** Ensure the device is fully charged. Connect it to a power source using the USB charging cable.
- **Cannot pair with Bluetooth device:**

    - Ensure the SafeFly Min+ is in the correct mode (TX for transmitting, RX for receiving).
    - Make sure your target Bluetooth device (headphones/speaker/phone) is in pairing mode.
    - Bring the devices closer together.
    - Press the "RESET" button on the SafeFly Min+ to clear previous connections and try pairing again.
    - Restart both the SafeFly Min+ and your Bluetooth device.

- **No audio or poor audio quality:**

    - Check that the 3.5mm audio cable is securely connected to both the SafeFly Min+ and the audio source/system.
    - Adjust the volume on both the SafeFly Min+ and the connected audio device/source.
    - Ensure there are no obstructions between the SafeFly Min+ and your Bluetooth headphones/speakers.
    - Verify that your Bluetooth headphones/speakers support the aptX codecs if you expect high-quality audio.

- **Battery level display inaccuracy:** The battery icon may not always reflect precise percentages. It is recommended to charge the device when the indicator shows a low level to avoid unexpected power off.
