3. OPERATING INSTRUCTIONS

3.1 Charging Your Device

The charger utilizes standard USB Type-A power sources for charging your USB Type-C device.

1. To access the cable, press the button on the charger casing to release the folded cable.
2. Connect the USB Type-A end of the cable to a power source (e.g., computer USB port, car charger, wall adapter, power bank).
3. Connect the USB Type-C end of the cable to your USB Type-C compatible device (e.g., Razer Barracuda X).
4. The device should begin charging automatically.

3.2 Data Synchronization

When connected to a computer, the cable supports data synchronization.

1. Connect the USB Type-A end of the cable to an available USB port on your computer.
2. Connect the USB Type-C end of the cable to your USB Type-C compatible device.
3. Your computer should recognize the connected device, allowing for data transfer and synchronization.

3.3 Folding and Storing

The 8-inch cable is designed to fold compactly for storage.

1. After use, disconnect the cable from both your device and the power source.
2. Gently fold the cable in half, guiding it back into its casing until it clicks securely into place.
3. Ensure the cable is fully retracted and secured to prevent damage during transport.

4. MAINTENANCE

Proper care ensures the longevity of your BoxWave USB Type-C Keychain Charger.

- **Cleaning:** Use a soft, dry cloth to wipe the cable and connectors. Avoid using harsh chemicals or abrasive materials.
- **Storage:** When not in use, ensure the cable is properly folded and secured within its casing. Store in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Avoid excessive bending or pulling on the cable, especially near the connectors, to prevent internal damage.

5. TROUBLESHOOTING

Refer to the table below for common issues and their solutions.

Issue	Possible Cause	Solution
Device not charging	Loose connection; Faulty power source; Damaged cable	Ensure both ends of the cable are securely connected. Try a different USB Type-A power source. Inspect the cable for visible damage.

Issue	Possible Cause	Solution
Device not syncing data	Loose connection; Computer port issue; Device settings	Verify secure connections. Try a different USB port on your computer. Check your device's USB connection settings (e.g., 'File Transfer' mode).
Cable not retracting properly	Obstruction; Internal mechanism issue	Ensure no debris is blocking the retraction path. Gently guide the cable. Avoid forcing the mechanism.
