Assembly is designed to be straightforward and does not require additional tools beyond what is provided. Follow the numbered steps and refer to the lettered parts and numbered hardware for easy identification.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a soft, clean surface. Identify each part using the provided labels (letters for large parts, numbers for hardware).
2. **Assemble Headboard and Footboard:** Attach the wooden panels to the metal headboard and footboard frames using the designated screws. Ensure they are securely fastened.
3. **Attach Side Rails:** Connect the side rails to the assembled headboard and footboard using the provided bolts. Do not fully tighten bolts until all connections are made.
4. **Install Support Legs:** Attach the nine independent support legs to the designated points on the bed frame. Ensure they are oriented correctly for maximum stability.
5. **Place Metal Slats:** Lay the twelve strong steel slats across the bed frame. The slats are designed for heavy-duty support. Ensure they are evenly spaced and secured according to the manual.
6. **Apply Non-Slip Strips and Foot Plugs:** Attach the non-slip strips to the slats to prevent mattress movement. Insert the plastic foot plugs into the bottom of the support legs to protect your floor and minimize noise.
7. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts and screws using the provided Allen wrench. Do not overtighten.

- **Under-Bed Storage:** Utilize the 12.6-inch clearance beneath the frame for convenient storage of boxes, bins, or other items.
- **Noise-Free Design:** The integrated non-slip strips and plastic foot plugs are designed to minimize noise and protect your flooring.
- **Weight Distribution:** For optimal longevity and stability, distribute weight evenly across the bed frame.

6. MAINTENANCE

- **Regular Cleaning:** Wipe the metal frame with a soft, damp cloth. For the wooden headboard, use a dry or slightly damp cloth.

Avoid harsh chemicals or abrasive cleaners.

- **Check Fasteners:** Periodically (e.g., every 3-6 months) inspect all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain the frame's stability and prevent squeaking.
- **Inspect Slats and Legs:** Ensure all metal slats are properly seated and the support legs are firm and level.
