Yeego YG-WD24-A

Yeego 24-Inch Dual Zone Wine Fridge Cooler (Model YG-WD24-A) Instruction Manual

Model: YG-WD24-A

1. INTRODUCTION

Thank you for choosing the Yeego 24-Inch Dual Zone Wine Fridge Cooler. This appliance is designed to provide optimal storage conditions for your wine and beverages, featuring dual temperature zones, adjustable shelving, and efficient cooling technology. Please read this manual thoroughly before installation and operation to ensure safe and correct use of your new wine cooler.

2. IMPORTANT SAFETY INFORMATION

To reduce the risk of fire, electric shock, or injury when using your appliance, follow these basic precautions:

- Read all instructions before using the wine cooler.
- Do not touch cold surfaces immediately after turning off the unit.
- Ensure proper grounding.
- Keep ventilation openings clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.

- Do not damage the refrigerant circuit.
- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- Unplug the appliance before cleaning or maintenance.

3. SETUP AND INSTALLATION

3.1 Unpacking

Carefully remove all packaging materials. It is recommended to retain the original packaging for future transport or service needs. Inspect the unit for any damage during transit.

3.2 Placement

This wine cooler is designed for versatile installation, including built-in, under-counter, or freestanding use. Ensure adequate ventilation around the unit. Refer to the dimensions below for proper fit.

Easy installation

Multiple installation methods

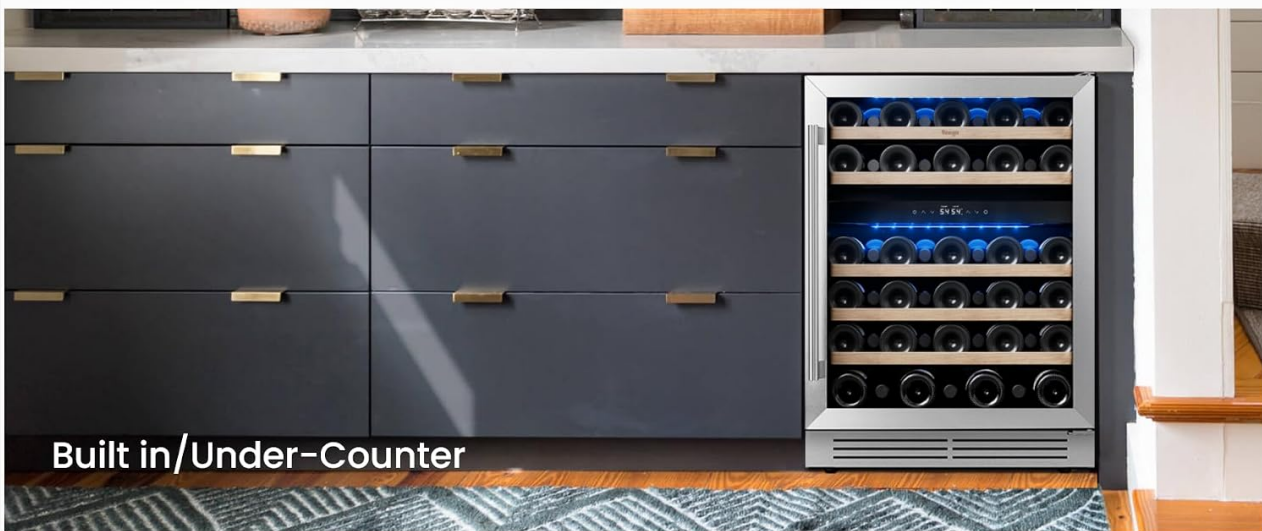

Image: Illustration of the wine cooler's flexible installation options: freestanding and built-in under a counter.

3.3 Leveling

The appliance features adjustable leveling feet. Adjust these feet to ensure the wine cooler is stable and level on uneven floors. Proper leveling prevents vibrations and ensures optimal performance.

3.4 Initial Power-On

After placement and leveling, allow the wine cooler to stand upright for 24 to 36 hours before plugging it in. This allows the compressor oil to settle, ensuring optimal cooling performance and longevity of the unit.

4. OPERATING INSTRUCTIONS

4.1 Temperature Control

The control panel allows you to set temperatures separately for the upper and lower zones. The temperature range for this dual zone cooler is 40-65°F (5-18°C). Use the up/down arrows to adjust the desired temperature

for each zone. The unit features precise 1°F temperature control and a power failure memory feature that restores previous settings.

4.2 Interior Lighting

The wine cooler features soft blue LED interior lighting. This lighting can be turned on or off via the control panel to enhance visibility and add a stylish touch to your collection.

5. PRODUCT FEATURES

5.1 Flexible Storage

This wine fridge is equipped with 5 adjustable and removable wooden shelves, designed to minimize friction and vibration. It can hold up to 52 standard Bordeaux bottles, allowing customization for various bottle sizes.

5.2 Dual Zone Temperature Control

The dual zone design allows for separate temperature settings, accommodating different wine types. An internal fan circulation system ensures consistent temperatures, while a carbon purification system helps eliminate odors, maintaining a fresh environment.

5.3 Advanced Compressor System

The advanced compressor provides fast, even cooling, superior to thermoelectric models in energy efficiency. Its 360° air circulation system balances humidity and temperature, crucial for wine preservation. The compressor operates quietly at 41-43 dB and minimizes vibrations.

5.4 Double Glass and Stainless Steel Door

The door features dual layers of tempered glass and a black insulating layer, blocking over 90% of UV rays to protect your wine. The sleek silver stainless steel frame is fingerprint-resistant and easy to clean, offering both style and durability.

Double-Layer Tempered Glass Door

Protects wine from harmful rays and running quietly
Effectively block 95% of UV rays

6. MAINTENANCE

6.1 Cleaning

Regularly clean the stainless steel door frame with a soft cloth and mild cleaner to maintain its appearance. The interior can be wiped with a damp cloth. Ensure the unit is unplugged before cleaning.

6.2 Carbon Filter Replacement

The internal carbon filter helps maintain a fresh, odor-free environment. It is recommended to replace the carbon filter annually. Contact customer support for replacement filter availability.

6.3 Defrosting

This wine cooler features an automatic defrost system, eliminating the need for manual defrosting.

7. TROUBLESHOOTING

If you experience issues with your wine cooler, please refer to the following common solutions:

- **Unit not cooling:** Check if the power cord is securely plugged in. Ensure the temperature settings are correct. Verify that the unit has been allowed to stand upright for 24-36 hours before initial use.
- **Excessive noise:** Ensure the unit is level using the adjustable feet. Check for any objects touching the back or sides of the unit.
- **Temperature fluctuations:** Confirm the door is sealing properly. Avoid frequent door openings. Ensure the unit is not exposed to direct sunlight or heat sources.
- **Water on shelves:** This is normal during the automatic defrost cycle. Ensure bottles are not blocking the drainage hole at the back of the unit.
