Bxmgr BN59-01432A VG-TM2360E

User Manual for Bxmgr BN59-01432A TM2360E Solar Voice Remote

Model: BN59-01432A VG-TM2360E

PRODUCT OVERVIEW

The Bxmgr BN59-01432A TM2360E is a solar-powered voice remote control designed for compatibility with various Samsung Smart TVs, including Neo QLED 8K HDR models. It features both solar and USB Type-C charging capabilities, voice control functionality, and dedicated shortcut buttons for popular streaming services.

SETUP AND PAIRING

The BN59-01432A TM2360E remote control can often be used out of the box with basic infrared functionality. However, to access all features, including voice control, Bluetooth pairing is recommended.

Initial Use (Infrared)

Upon first use, the remote may operate basic TV functions (like power, volume, channel) via infrared without any pairing. Point the remote directly at your TV for this functionality.

Bluetooth Pairing for Full Functionality

For voice control and more stable button responsiveness, pair the remote via Bluetooth:

1. Ensure your Samsung Smart TV is powered on.
2. Point the remote control towards the TV.

3. Press and hold the **Back** button (*curved arrow*) and the **Play/Pause** button (*triangle and two vertical lines*) simultaneously for 3 seconds or more.
4. A "Pairing has begun" message will appear on your TV screen.
5. Release the buttons once the indicator light above the power button illuminates.
6. The TV will confirm successful pairing.

Image: Visual guide demonstrating the simultaneous press of the Back and Play/Pause buttons for Bluetooth pairing.

OPERATING INSTRUCTIONS

Once paired, the remote offers various functions for an enhanced viewing experience.

Voice Control

The remote features a voice search function. After successful Bluetooth pairing:

- Press and hold the **Microphone icon button** on the remote control.

- Speak your command or desired content (e.g., "Open Netflix," "Change to Channel 5," "Volume up").
- Release the button when finished speaking.

Shortcut Buttons

Dedicated shortcut buttons provide one-touch access to popular streaming services:

- Press the **Netflix** button to launch Netflix.
- Press the **Disney+** button to launch Disney+.
- Press the **Prime Video** button to launch Prime Video.
- Other buttons like **Samsung TV Plus** are also available for direct access.

MAINTENANCE AND CHARGING

The BN59-01432A TM2360E remote offers two convenient charging methods to ensure continuous operation without the

need for disposable batteries.

Solar Charging

The remote is equipped with a solar charging panel on its back. To charge using solar power:

- Place the remote control with its back panel facing a light source, such as sunlight or bright indoor lighting.
- Regular exposure to light will help maintain the battery charge and extend its life.

USB Type-C Charging

For faster charging or when solar charging is not feasible, use a USB Type-C cable (not included):

- Locate the USB Type-C port on the remote control.
- Connect a standard USB Type-C cable (avoid fast charging cables) to the remote and a power source (e.g., TV USB port, wall adapter).
- The LED light on the front of the remote will illuminate during charging.
- The LED light will turn off once the battery is fully charged.

BN59-01432A

There are two ways to charge

1. Solar charging, just expose the solar panel on the back of the remote control to the sunlight to charge it
- 2, USB Type-C charging.
USB cable not included

Image: Detailed view of the remote's back, highlighting the solar charging panel and the USB Type-C charging port for convenient power options.

Important Note: When not in use, expose the remote control to light to extend its battery life. This dual charging system provides flexibility and reduces environmental impact by eliminating the need for disposable batteries.

TROUBLESHOOTING

If you encounter issues with your remote control, refer to the following common solutions:

Remote Not Responding / Buttons Not Working

- **Check Battery Level:** Ensure the remote is sufficiently charged. Use either solar charging or USB Type-C charging.
- **Re-pair Remote:** If the remote was previously paired via Bluetooth but is no longer responding, try re-pairing it by holding the Back and Play/Pause buttons simultaneously for 3 seconds.
- **Line of Sight (Infrared):** For basic functions without Bluetooth pairing, ensure there is a clear line of sight between the remote and the TV's infrared receiver.

Voice Function Not Working

- **Ensure Bluetooth Pairing:** The voice function requires the remote to be paired with the TV via Bluetooth. Follow the pairing instructions in the "Setup and Pairing" section.
- **Hold Microphone Button:** Remember to press and hold the microphone button while speaking your command. Release it after speaking.
- **Check TV Settings:** Verify that voice recognition settings are enabled on your Samsung Smart TV. Consult your TV's user manual for specific instructions.

Intermittent Connectivity

- **Reduce Interference:** Ensure there are no large metallic objects or other electronic devices causing interference between the remote and the TV.
- **Proximity:** While Bluetooth offers more range than infrared, ensure you are within a reasonable distance from the TV.

PRODUCT SPECIFICATIONS

Feature	Detail
Model Number	BN59-01432A VG-TM2360E
Brand	Bxmgr
Power Source	Solar Cell, USB Type-C (Rechargeable Battery Included)
