3. INSTALLATION

Proper installation is crucial for the optimal performance and security of your Godrej Smart Lock. It is recommended to watch the official installation video and follow the steps carefully.

Your browser does not support the video tag.

Video 3.1: Official installation video for Godrej Catus Connect & Catus Touch Plus digital locks. This video demonstrates the step-by-step process for mounting the lock on a wooden door.

Installation Steps Overview:

- 1. Handle Configuration:** Adjust the door handle on both the outside and inside bodies according to your door's left-hand or right-hand setup using an Allen key.
- 2. Making Cavities on the Door:** Use the provided marker template to accurately mark points on the door. Punch the marked points and drill holes for the lock components, ensuring correct depth and diameter.
- 3. Adding Mortise:** Insert the mortise lock body into the prepared cavity on the door edge. Ensure the latch is rotated correctly based on the door's opening direction. Secure it with screws.
- 4. Installing Outside Body:** Insert the shank and split pin into the mortise. Connect the wiring and carefully align the outside

body with the drilled holes, passing the wires through.

5. **Installing Inside Body:** Connect the wiring from the outside body to the inside body. Secure the inside body to the door using anti-theft screws. Insert the AA batteries into the battery compartment.
6. **Installing the Striker Plate:** Mark the striker plate grooves on the door frame using the lock body level. Create the necessary cavity for the striker box and install the striker box and plate, securing them with screws.

4. SETUP AND PROGRAMMING

After installation, you need to program your lock with user credentials.

4.1 Fingerprint Registration (Catus Touch Plus Only)

- Access the programming menu (refer to the lock's on-screen prompts or voice guide).
- Select the fingerprint registration option.
- Place your finger on the sensor multiple times as instructed until registration is complete.
- Test the registered fingerprint to ensure it unlocks the door.

4.2 PIN Code Registration

- Enter the programming mode.
- Select the PIN code registration option.
- Enter your desired 4 to 9 digit PIN code, then re-enter to confirm.
- Test the new PIN code.
- For OTP generation, use the mobile application (Catus Touch Plus only).

4.3 RFID Card Registration (Catus Touch Plus Only)

- Enter the programming mode.
- Select the RFID card registration option.
- Present the RFID card to the designated sensor area on the lock.
- The lock will confirm successful registration.
- Test the registered RFID card.

5. OPERATING INSTRUCTIONS

To unlock the door using different access methods:

- **Fingerprint:** Place your registered finger on the fingerprint sensor.
- **PIN Code:** Enter your registered PIN code on the keypad, followed by the '#' key.
- **RFID Card:** Present your registered RFID card to the card reader area.
- **Mechanical Key:** Insert the mechanical key into the hidden keyhole and turn to unlock.

Locking the Door: The lock automatically engages when the door is closed. For enhanced security, activate the one-touch privacy key from the inside.

Advanced Features:

- **Anti-prank Alarm:** Activates after multiple incorrect access attempts.
- **Adjustable Spy Code:** Allows entering random digits before or after your actual PIN to prevent onlookers from guessing your code.
- **Low Battery Indication:** Visual and/or audible alerts when batteries are low.
- **Wrong Password Indication:** Alerts for incorrect PIN entries.
- **Emergency Micro USB:** For temporary power supply in case of complete battery drain.
- **Multi-Level Volume Control:** Adjust the lock's sound alerts and voice prompts.
- **One-Touch Privacy Key:** Engages an additional security bolt from the inside, preventing external access even with valid

credentials.

6. MAINTENANCE

To ensure the longevity and optimal performance of your smart lock:

- **Cleaning:** Wipe the lock surface with a soft, dry cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish and electronic components.
- **Battery Replacement:** Replace all four AA batteries when the low battery indicator appears. Use high-quality alkaline batteries for best performance. Do not mix old and new batteries or different types of batteries.
- **Mechanical Parts:** Periodically check the handle and latch for smooth operation. Do not lubricate with oil; consult a professional if mechanical issues arise.
- **Firmware Updates:** For Catus Touch Plus, check the mobile application for any available firmware updates to ensure the latest features and security enhancements.

7. TROUBLESHOOTING

If you encounter any issues with your Godrej Smart Lock, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Lock not responding	Dead batteries	Replace all AA batteries. Use emergency Micro USB for temporary power.
Fingerprint not recognized	Finger not placed correctly, dirty sensor, unregistered fingerprint	Ensure finger is clean and placed centrally. Clean sensor. Re-register fingerprint if necessary.
PIN code not working	Incorrect PIN, unregistered PIN	Verify the PIN code. Ensure it is registered. Try using the spy code feature.
RFID card not working	Unregistered card, card not presented correctly	Ensure the card is registered. Present the card firmly to the reader.
Door not locking automatically	Misalignment of door/frame, obstruction	Check door alignment and ensure no obstructions prevent the latch from engaging.

If the issue persists after attempting these solutions, please contact customer support.
