ASSEMBLY INSTRUCTIONS

Follow these steps carefully for proper assembly. It is recommended to assemble the bed frame with at least two

people for ease and safety, although it can be done by one person with patience.

1. **Unpack Components:** Carefully unpack all parts from the box. Verify that all components listed in the parts list are present and undamaged. Lay out all metal frame pieces on a clean, flat surface, preferably on a rug or soft material to prevent scratches.
2. **Assemble the Main Frame:** Connect the main frame sections using the provided hardware. Ensure all screws are tightened securely but do not overtighten. The frame is designed to be sturdy once fully assembled.
3. **Install Support Legs:** Attach the central support legs to the designated points on the frame. These legs provide crucial support for the mattress.
4. **Attach Slats:** Secure the metal slats across the frame. These slats eliminate the need for a box spring. Ensure they are evenly spaced and firmly attached.
5. **Install LED Light Strip:** The LED light strip comes with adhesive buckles and zip ties. Attach the light strip along the inner perimeter of the bed frame, ensuring it is securely fastened with both the adhesive and zip ties for long-term stability.
6. **Connect Charging Station:** Mount the charging station to the designated area on the bed frame. Plug the charging station's power cord into a wall outlet.

MAINTENANCE

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the finish.
- **Tighten Connections:** Periodically check and tighten all screws and bolts to ensure the frame remains stable and noise-free.
- **LED Strip Care:** Ensure the LED strip remains securely attached. If any part becomes loose, re-secure it with the provided adhesive buckles or zip ties.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Bed frame is wobbly or noisy.	Loose connections or uneven assembly.	Check all bolts and screws and tighten them securely. Ensure the frame is on a level surface.
LED lights are not working.	Power connection issue, remote battery, or damaged strip.	Verify the LED strip is properly plugged into its power source and the wall outlet. Check remote control battery. Inspect the LED strip for any visible damage.
Charging station is not providing power.	Not plugged in, outlet issue, or device compatibility.	Ensure the charging station is fully plugged into a working wall outlet. Test the outlet with another device. Confirm your device is compatible with the USB/Type-C ports.
