4.1 Adding Seam Allowances

- Identify the desired seam allowance measurement (e.g., 1/4 inch, 1/2 inch, 1 cm).

- Adjust the T-shaped sliding gauge by gently pushing or pulling it along the ruler until the desired measurement aligns with the edge of the gauge.
- Place the ruler on your fabric or pattern, aligning the edge of the ruler with your existing pattern line or fabric edge.
- Use a fabric marker or pencil to draw a new line along the edge of the sliding gauge, creating a consistent seam allowance.

4.2 Marking Buttonholes or Code Spacing

- Determine the required spacing for buttonholes or other markings.
- Adjust the sliding pointers on the ruler to match the desired interval.
- Position the ruler on your fabric and use the pointers as guides to mark consistent spacing for multiple elements.

4.3 General Measurement

- Utilize the clearly printed inch and centimeter scales along the ruler for standard length measurements.
- The sliding gauge can also be used as a stop for repetitive measurements.

5. MAINTENANCE

Proper care will ensure the longevity and accuracy of your BEALIFE A23 Small Sewing Ruler.

- **Cleaning:** Wipe the ruler with a soft, dry cloth after each use to remove fabric dust or pencil marks. Avoid using harsh chemicals or abrasive cleaners, as these may damage the plastic or fade the markings.
- **Storage:** Store the ruler flat in a dry place, away from direct sunlight or extreme temperatures, to prevent warping or discoloration.
- **Handling:** Avoid dropping the ruler or subjecting it to excessive force, which could cause breakage or affect its precision.

6. TROUBLESHOOTING

The BEALIFE A23 Small Sewing Ruler is a simple, durable tool. Most issues can be resolved with basic checks.

- **Inaccurate Measurements:**
 - Ensure the ruler is clean and free from debris that might obstruct accurate placement.
 - Verify that the sliding gauge is firmly set to the desired measurement and has not shifted during use.
 - Confirm that the ruler is placed flat against the fabric or pattern without any gaps or angles.
- **Sliding Gauge Sticking:**
 - Check for any lint or small fabric fibers caught in the sliding mechanism. Gently remove them.
 - Ensure the ruler is not bent or warped, which could impede the slider's movement.
