8. MAINTENANCE

To ensure the longevity and optimal performance of your sound bar, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the surface of the sound bar. Do not use liquid cleaners or abrasive materials, as they may damage the finish.
- **Storage:** If storing the sound bar for an extended period, disconnect it from power and store it in a cool, dry place away from direct sunlight and extreme temperatures.
- **Ventilation:** Ensure that the ventilation openings are not blocked to prevent overheating.

9. TROUBLESHOOTING

If you encounter issues with your sound bar, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No power	Power cable not connected or power outlet not working.	Ensure the power cable is securely connected to the sound bar and a working power outlet.
No sound	Incorrect input source selected, volume too low, or incorrect cable connection.	Verify the correct input source is selected (ARC, OPT, AUX, Bluetooth). Increase the volume. Check all audio cables are securely connected to both the TV/device and the sound bar.
Bluetooth pairing failed	Sound bar not in pairing mode, device Bluetooth off, or too far from the sound bar.	Ensure the sound bar is in Bluetooth pairing mode (flashing LED). Turn on Bluetooth on your device and ensure it's within range (approx. 10 meters). Try restarting both devices.
Remote control not working	Batteries are dead or inserted incorrectly, or obstruction between remote and sound bar.	Replace batteries with new ones, ensuring correct polarity. Remove any obstructions between the remote and the sound bar's sensor.
Sound cuts out intermittently	Interference, loose connection, or outdated TV firmware.	Check for sources of interference. Ensure all cables are firmly connected. Consider updating your TV's firmware if the issue persists, especially with ARC connections.
