## PRODUCT FEATURES

- Immersive 7.1 Virtual Surround Sound:** Utilizes advanced audio processing for virtual 7.1 surround sound, providing an immersive listening experience for gaming and movies by clearly distinguishing sounds from different directions.
- High-Fidelity Audio:** Supports 24-bit/192kHz high-resolution audio with a professional DSP sound card chip, ensuring clear, detailed, and rich sound quality.
- Versatile Connectivity:** Equipped with USB-C and three 3.5mm jacks (for microphone, headphones, and other audio devices). Supports both TRS and TRRS microphones.
- Wide Compatibility:** Compatible with PCs, laptops, gaming consoles (PS5, PS4, Xbox One, Nintendo Switch), and speaker systems. Driver-free support for Windows 8/8.1/10/11, Mac OS, and Linux systems.
- Powerful Sound Adjustment and Control:** Features an independent equalizer with 16 preset sound effects. Includes volume control, one-click mute, and one-click switching between Game, Movie, and Standard audio modes.

- **Optimized for Gaming:** Precise sound effects help capture key audio cues in games, improving reaction times. Four additional game sound effects are available.
- **Dual Output Support:** Allows simultaneous connection of headphones and external speakers.
- **RGB Lighting:** Features vibrant RGB lighting, specifically designed to enhance your gaming setup.
- **Easy Software Installation:** Install the VENTION Audio Center software for full audio performance and customization. The software supports multiple languages.

## SETUP

### 1. Hardware Connection

1. Connect the VENTION External USB DAC to your computer or gaming console using the provided USB-C cable.
2. Plug your headphones into the headphone jack.
3. If using a microphone, connect it to the microphone jack.
4. For external speakers, connect them to the audio output jack.

## MAINTENANCE

- Keep the device clean by wiping it with a soft, dry cloth. Avoid using liquid cleaners.
- Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- Avoid dropping or subjecting the device to strong impacts.
- Ensure cables are connected securely but without excessive force to prevent damage to ports.

## TROUBLESHOOTING

- **No Sound Output:**
  - Check all cable connections (USB, headphones, speakers).
  - Ensure the device is selected as the default audio output in your operating system's sound settings.

- Verify that the volume is not muted on the device or in your system settings.
- If using the VENTION Audio Center software, ensure it is correctly installed and configured.

- **Microphone Not Working:**

- Ensure the microphone is properly connected to the correct jack.
- Check if the microphone is muted on the device or in your system's sound input settings.
- Verify that the VENTION device is selected as the default input device.
- Confirm your microphone type (TRS/TRRS) is compatible.

- **Software/Driver Issues:**

- If experiencing issues with advanced features (e.g., 7.1 surround sound, equalizer), ensure the VENTION Audio Center software is installed correctly and is up to date.
- Try reinstalling the software if problems persist.
- Consult the VENTION support website for the latest drivers and troubleshooting guides.

- **Poor Sound Quality:**

- Ensure you are using high-quality audio sources.
- Check your equalizer settings in the VENTION Audio Center software; reset to default if necessary.
- Test with different headphones/speakers to rule out issues with peripherals.
