7. TROUBLESHOOTING

If you encounter any issues with your tablet, refer to the following common troubleshooting steps:

| Problem | Solution |
|------------------------------|---|
| Tablet does not turn on | Ensure the battery is charged. Connect the tablet to the charger for at least 30 minutes before attempting to power it on. If it still doesn't turn on, try a hard reset using the reset hole. |
| Slow performance or app lag | Close unnecessary background applications. Clear cache and data for problematic apps. Ensure sufficient free storage space. Restart the tablet. Note that the tablet may not be suitable for the latest graphics-intensive games or large applications. |
| Wi-Fi connection issues | Restart your Wi-Fi router and the tablet. Forget the network and reconnect. Ensure you are within range of the Wi-Fi signal. |
| Battery drains quickly | Reduce screen brightness. Close unused apps. Turn off Wi-Fi or Bluetooth when not in use. Enable Dark Theme. Note that the 3500mAh battery capacity requires monitoring during heavy use. |
| Micro SD card not recognized | Ensure the card is inserted correctly. Try reinserting the card. Test with a different compatible Micro SD card. |
