MAINTENANCE

Proper care will ensure the longevity and appearance of your BOSHIRO dresser.

- **Cleaning:** Wipe the dresser with a dry cloth to remove dust and dirt. Avoid using harsh chemicals or abrasive cleaners, which can damage the smooth white finish.
- **Spills:** In case of spills, wipe immediately with a dry or slightly damp cloth. The high-quality materials provide waterproof protection.
- **Drawer Glides:** Periodically check drawer glides for smooth operation. If they become stiff, a small amount of silicone spray can be applied to the tracks.
- **Stability:** Regularly check all screws and fasteners to ensure they are tight. This helps maintain the dresser's sturdy structure and prevents wobbling.

TROUBLESHOOTING

This section addresses common issues you might encounter with your dresser.

Problem	Possible Cause	Solution
Drawers are difficult to open/close or come off tracks.	Misaligned drawer slides, loose screws, or overfilled drawers.	Ensure all screws on the drawer slides and cabinet are tightened. Check for any obstructions in the tracks. Do not overfill drawers beyond their capacity. Some users have found adding a washer in front of the screws that go to the railing can help stabilize the wheels.
Dresser feels wobbly or unstable.	Loose assembly, uneven floor, or anti-tip device not installed.	Re-tighten all assembly screws. Ensure the dresser is placed on a level surface. Crucially, install the anti-tip device provided to secure the dresser to the wall.
Missing parts during assembly.	Packaging error or parts overlooked.	Carefully re-check all packaging materials. If parts are still missing, contact BOSHIRO customer service immediately (see 'Support' section).
