## Allewie AK-LE6017

# Allewie King Bed Frame Instruction Manual

Model: AK-LE6017

## INTRODUCTION

---

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your new Allewie King Velvet Upholstered Platform Bed Frame. Please read all instructions carefully before beginning assembly and retain this manual for future reference.

The Allewie King Bed Frame features a velvet upholstered platform design with an adjustable vertical channel tufted headboard, strong wooden slats, and is designed for easy assembly. It supports a maximum weight of 800 pounds.

## SAFETY INFORMATION

---

### Important Safety Warnings:

- This product has a maximum weight recommendation of 800 pounds. Do not exceed this limit.
- Proper assembly is required to prevent instability or collapse. Follow all assembly steps precisely.
- Handle components with care due to the product's weight (approximately 84.7 pounds). It is recommended to have two people for assembly.
- People with limited mobility or small children should be cautious of the 7.9 inches ground-to-item distance to avoid tripping hazards.
- Ensure all connections are securely tightened before use. Periodically check and re-tighten fasteners as needed.
- Do not use power tools for assembly unless specifically instructed, as over-tightening can damage components.

## PACKAGE CONTENTS

Before beginning assembly, verify that all parts are present and undamaged. Refer to the included parts list in your physical manual for specific component identification.

*Note: Mattress is not included.*

## SETUP AND ASSEMBLY

Assembly typically requires two adults and takes approximately 1-2 hours. Follow the numbered steps provided in your physical instruction manual. Do not fully tighten screws until all components are loosely assembled.

1. **Step 1: Unpack and Identify Parts.** Carefully remove all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided parts list.
2. **Step 2: Assemble the Headboard.** Attach the headboard support legs to the main headboard panel. Ensure the adjustable height mechanism is correctly aligned.

3. **Step 3: Connect Side Rails.** Attach the side rails to the headboard and footboard. Ensure all connections are secure but do not fully tighten screws yet.
4. **Step 4: Install Center Support.** Place the center support beam and legs into position.
5. **Step 5: Secure Wooden Slats.** Unroll and attach the wooden slats to the side rails. The slats are designed with Velcro for easy and secure placement, which also helps to reduce noise.

- Step 6: Final Tightening.** Once all components are in place and aligned, fully tighten all screws and fasteners.
- Step 7: Attach Feet Cushions.** Apply the provided feet cushions to the bottom of all support legs to protect your flooring and further reduce noise.

## OPERATING INSTRUCTIONS

Your Allewie King Bed Frame is designed for optimal comfort and support. No box spring is required for use with this platform bed.

- Mattress Placement:** Carefully place your King-sized mattress directly onto the wooden slats. Ensure the mattress is centered and evenly distributed. The recommended mattress thickness is 8-14 inches.
- Headboard Adjustment:** The headboard can be adjusted to two different heights (47 inches or 51 inches) to accommodate various mattress thicknesses. Adjust the headboard height during assembly or by carefully loosening the connecting bolts, adjusting, and re-tightening.
- Weight Capacity:** The bed frame is designed to support a maximum weight of 800 pounds, including the mattress and occupants.

## MAINTENANCE

To ensure the longevity and appearance of your bed frame, follow these maintenance guidelines:

- **Cleaning:** Wipe the velvet upholstery with a dry cloth to remove dust and light debris. For spills, blot immediately with a clean, dry cloth. Avoid harsh chemicals or abrasive cleaners.
- **Fastener Check:** Periodically (e.g., every 3-6 months) check all bolts and screws to ensure they are tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Avoid Excessive Moisture:** Keep the bed frame in a dry environment to prevent damage to the wood and upholstery.
- **Relocation:** When moving the bed frame, lift it rather than dragging it to prevent damage to the legs and frame structure.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose fasteners; uneven floor.	Ensure all bolts and screws are fully tightened. Check if the bed is on a level surface; use shims if necessary.
Squeaking noises.	Loose connections; friction between components or slats.	Re-tighten all fasteners. Ensure slats are properly seated and the EVA mute foam is in place. Apply a small amount of lubricant (e.g., silicone spray) to contact points if necessary.
Headboard not adjusting properly.	Obstruction; bolts too tight or misaligned.	Check for any obstructions. Loosen headboard bolts, adjust to desired height, then re-tighten securely.
Missing parts or damaged components.	Shipping error or manufacturing defect.	Contact Allewie customer support immediately with your purchase details. Do not attempt to assemble with missing or damaged parts.
