## PRODUCT OVERVIEW

---

Familiarize yourself with the components and controls of your Cuifati Mini Body Camera.

# Product Description

Figure 3: Labeled components of the Cuifati Mini Body Camera.

- **Status Light:** Indicates device status (e.g., recording, charging).
- **Lens:** Main camera lens for video and photo capture.
- **Infrared Lamp:** Provides illumination for night vision.
- **Back Clip:** For attaching the camera to clothing or other surfaces.
- **Display Screen:** 1.3-inch LCD for live view, playback, and menu navigation.
- **Menu Key (M):** Accesses device settings.
- **OK Key:** Confirms selections or starts/stops functions.
- **Pause Key:** Pauses playback or recording.
- **Rope Hole:** Attachment point for the lanyard.
- **Video Recording Key:** Initiates and stops video recording.
- **Charging Port (Type-C):** For charging the device and connecting to a computer.
- **Memory Card Slot:** Insert microSD card for storage.
- **Photo Shooting Button:** Captures still images.
- **Sound Key:** Controls audio recording.
- **Power Key:** Turns the device on or off.

### 1. Charging the Battery

Before first use, fully charge the camera's built-in lithium-ion battery. Connect the camera to a power source using the provided Type-C USB cable. The status light will indicate charging status. A full charge provides approximately 20 hours of work time and 10 hours of video recording.

Figure 4: Built-in 1200mAh battery for extended use.

### 2. Inserting a Memory Card

The camera supports up to a 256GB memory card (not included). Locate the memory card slot on the side of the camera. Gently insert the microSD card with the gold contacts facing down until it clicks into place. To remove, push the card in slightly until it springs out.

## OPERATING INSTRUCTIONS

---

### 1. Powering On/Off

- **To Power On:** Press and hold the Power Key until the display screen illuminates.
- **To Power Off:** Press and hold the Power Key until the device shuts down.

### 2. Video Recording

The camera records in 1440P HD at 30 frames per second with a 120° wide-angle lens and infrared night vision.

- **To Start Recording:** Press the Video Recording Key. The status light will change, and a recording indicator will appear on the screen.
- **To Stop Recording:** Press the Video Recording Key again.
- **Loop Recording:** The camera supports loop recording, automatically overwriting the oldest files when the memory card is full.

**Full HD**  
**1440P 30fps**

Clear detail, 120° wide angle  
With infrared night vision

## 5. Playback and File Management

The 1.3-inch LCD screen supports live playback, browsing, and pausing of videos, photos, and recordings directly on the device.

# 1.3 inch color screen

Premium LCD screen, support live playback  
Browse, play and pause video,  
photos and recordings

Figure 8: 1.3-inch color screen for on-device playback.

- **On-Device Playback:** Use the Menu, OK, and Pause keys to navigate and play files on the screen.
- **Connecting to Computer:** Connect the camera to a computer via the Type-C USB cable to transfer, view, or delete files.
- **OTG Function:** If your mobile phone supports OTG, you can connect the camera directly to your phone for playback and file management.

## MAINTENANCE

---

### 1. Cleaning

- Use the provided cleaning cloth or a soft, dry cloth to wipe the camera body and lens.
- Do not use liquid cleaners or solvents, as they may damage the device.

### 2. Storage

- Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- Remove the memory card if storing for extended periods.

## TROUBLESHOOTING

If you encounter issues with your camera, refer to the following common problems and solutions:

<b>Problem</b>	<b>Solution</b>
Camera does not power on.	Ensure the battery is charged. Connect to a power source and try again.
Cannot record video/photo.	Check if a memory card is inserted correctly and has sufficient free space. Format the memory card if necessary (this will erase all data).
Memory card not recognized.	Ensure the memory card is inserted correctly. Try a different compatible memory card. Format the card using the camera's menu or a computer.
Poor video/audio quality.	Ensure the lens is clean. Check lighting conditions. For audio, ensure the microphone is not obstructed.
Device freezes or becomes unresponsive.	Press and hold the Power Key for 10-15 seconds to force a restart.
