REALME NOTE 60 DUAL-SIM SMARTPHONE

Model: RMX3933

Introduction

This manual provides essential information for the proper use and maintenance of your realme Note 60 Dual-SIM Smartphone. Please read this manual thoroughly before using the device to ensure optimal performance and longevity. The realme Note 60 is a versatile smartphone powered by an octa-core processor, featuring a 6.74-inch IPS LCD display, 128GB of internal storage, and 6GB of RAM. It operates on Android 14 with Realme UI and is equipped with a 5000mAh battery.

1. Setup

1.1 Unboxing and Initial Inspection

Upon opening the package, ensure all components are present. The standard package includes the realme Note 60 smartphone and a USB Cable. Inspect the device for any physical damage before proceeding.

1.2 SIM Card and microSD Card Installation

The realme Note 60 supports Dual-SIM functionality and a dedicated microSDXC slot for expandable storage.

1. Locate the SIM tray on the side of the device.
2. Insert the SIM ejector tool (not included, but commonly found with smartphones) into the small hole on the SIM tray to eject it.
3. Place your Nano-SIM cards into the designated slots (SIM1 and SIM2) and the microSD card into its dedicated slot, ensuring correct orientation.
4. Gently push the tray back into the device until it is flush.

1.3 Powering On and Initial Setup

To power on your device, press and hold the Power button located on the side until the realme logo appears. Follow the on-screen prompts to complete the initial setup, which includes selecting your language, connecting to a Wi-Fi network, and setting up your Google account.

2.3 Camera Usage

The realme Note 60 is equipped with a 32 MP rear camera (f/1.8, wide, PDAF, Auxiliary lens) and a 5 MP front camera (wide).

1. Open the Camera application from your home screen or app drawer.
2. Select between photo, video, or other modes.
3. Tap the shutter button to capture an image or start/stop recording.

2.4 Connectivity

Your device supports 4G/LTE cellular networks and Wi-Fi connectivity.

- **Wi-Fi:** Go to *Settings > Network & internet > Wi-Fi* to connect to available Wi-Fi networks.
- **Mobile Data:** Ensure your SIM card is active and mobile data is enabled via *Settings > Network & internet > Mobile network*.

3. Maintenance

3.1 Cleaning Your Device

Use a soft, lint-free cloth to clean the screen and body of your phone. Avoid using harsh chemicals or abrasive materials.

3.2 Software Updates

Regularly check for and install software updates to ensure your device has the latest features, security patches, and performance improvements. Go to *Settings > About phone > Software update*

3.3 Battery Care

The realme Note 60 is equipped with a 5000mAh non-removable battery.

- Avoid extreme temperatures, as they can degrade battery life.
- Use the provided USB cable for charging.
- Do not fully drain the battery frequently.

3.4 Storage Management

Your device comes with 128GB of internal storage. To optimize performance, regularly manage your storage by deleting unnecessary files, uninstalling unused apps, and utilizing cloud storage or the microSDXC slot for larger media files.

4. Troubleshooting

4.1 Common Issues and Solutions

- **Device not turning on:** Ensure the battery is charged. Connect the device to a power source using the USB cable and try powering on after a few minutes.
- **Network connectivity issues:** Check if your SIM card is properly inserted. Verify that mobile data is enabled in settings. If issues persist, contact your network provider.
- **Apps crashing or freezing:** Try restarting the app. If the problem continues, clear the app's cache and data via *Settings > Apps > [App Name] > Storage & cache*
- **Slow performance:** Close unused background apps. Clear cache and temporary files. Consider uninstalling large or rarely used applications.

4.2 Factory Reset

A factory reset will erase all data from your device and restore it to its original factory settings. This should be used as a last resort for persistent software issues. **Warning:** Back up all important data before performing a factory reset. Go to *Settings > System > Reset options > Erase all data (factory reset)*
