Roinvou Android 13 Car Radio for Honda Accord 6 1998-2003

[2G+64G] Android 13 Car Radio for Honda Accord 6 1998-2003

Model: For Honda Accord 6 1998-2003 | Brand: Roinvou

Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your Roinvou Android 13 Car Radio. Designed specifically for the Honda Accord 6 (1998-2003) models, this 9-inch touch screen car stereo offers advanced features including Wireless CarPlay, Android Auto, GPS navigation, Wi-Fi, Bluetooth, voice control, and steering wheel control support. Please read this manual thoroughly before installation and use to ensure proper functionality and safety.

The Roinvou Android 13 Car Radio with its main features and included accessories like the backup camera and microphone.

Safety Information

Always prioritize safety. Improper installation or operation can lead to vehicle damage or personal injury. Adhere to the following guidelines:

- Professional installation is recommended to ensure correct wiring and functionality.
- Do not operate the device or watch videos while driving, as this can cause distraction and lead to accidents.
- Ensure all connections are secure and properly insulated to prevent short circuits.
- Keep the device away from water and excessive heat.
- Only use accessories and parts specified by the manufacturer.

Package Contents

Verify that all items listed below are included in your package:

- 1 x Car Stereo Unit for Honda Accord 6
- 1 x Power Cable
- 1 x RCA Harness
- 1 x GPS Antenna
- 1 x AHD Backup Camera
- 1 x External Microphone
- 1 x Rear Camera Input Cable
- 2 x Dual USB Cables
- 1 x Installation Tool

Setup and Installation

Pre-Installation Considerations

This car radio is designed for Honda Accord 6 models manufactured between 1998 and 2003. Ensure your vehicle's dashboard matches the provided frame before proceeding with installation.

Comparison showing the vehicle's dashboard before and after the installation of the Roinvou car radio.

General Installation

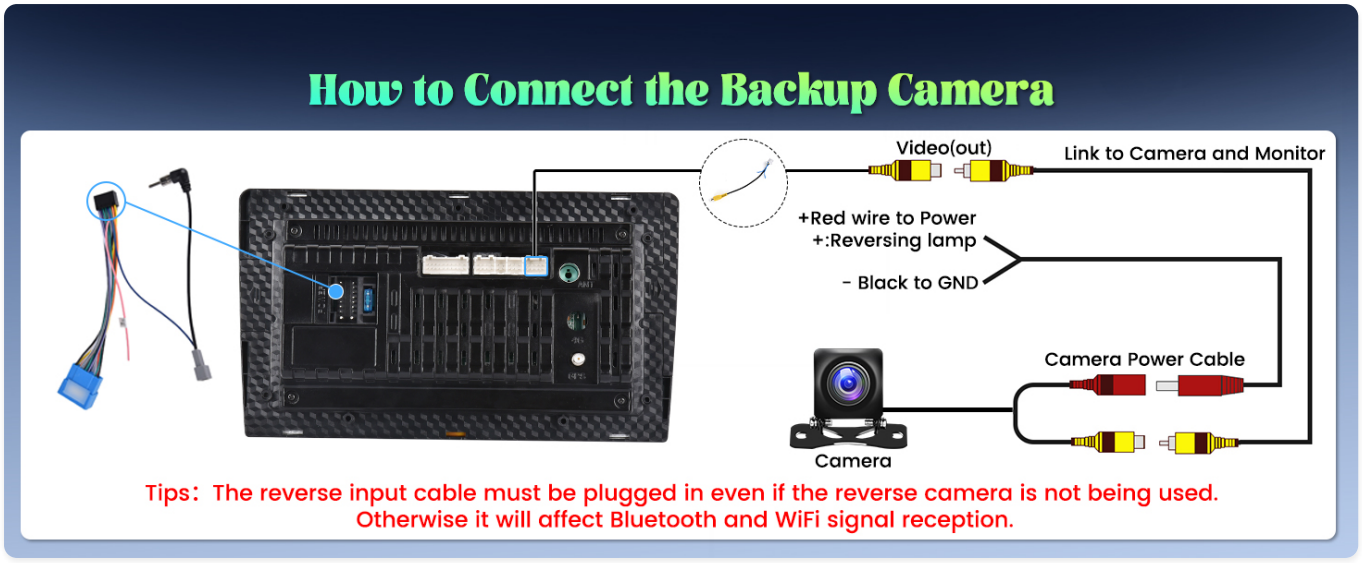

1. Disconnect the vehicle's battery to prevent electrical shorts.
2. Carefully remove the factory radio and dashboard trim.
3. Connect the provided power cable, RCA harness, and other necessary cables to the car radio and the vehicle's wiring harness.
4. Secure the car radio into the dashboard opening.
5. Reconnect the vehicle's battery and test the unit.

Backup Camera Connection

The included AHD backup camera provides enhanced safety when reversing. Follow these steps for connection:

1. Connect the yellow RCA video output cable from the camera to the 'Video(out)' port on the car radio.
2. Connect the red wire from the camera's power cable to the vehicle's reversing lamp power (+).
3. Connect the black wire from the camera's power cable to a ground (GND) point.
4. Ensure the reverse input cable is plugged into the car radio, even if the reverse camera is not being used, to avoid

affecting Bluetooth and Wi-Fi signal reception.

Detailed wiring diagram illustrating how to connect the backup camera to the car radio system.

Steering Wheel Control (SWC) Setup

The car radio supports steering wheel controls for convenient operation.

- **Without CANBUS Decoder:** Connect the plugs or the steering wheel control wires (Key1/Key2) in the power cable to the corresponding port or wire of your original car. Then, go to "SteeringWheelKey" in the manual match settings to activate the button functions.
- **With CANBUS Decoder:** Connect the CANBUS before powering on the machine. Then, follow this path: Settings > Factory Setup (Password 000000) > Can Settings. Select the brand of the CANBUS decoder and then the matching model and year according to your actual situation to make SWC work properly.

Operating Instructions

System Overview

The car radio operates on a powerful Android 13 system with a 4-core processor, 2GB RAM, and 64GB ROM, ensuring a smooth and responsive user experience on its 9-inch IPS touchscreen.

An illustration highlighting the internal components: a 4-core CPU, 2GB RAM, and 64GB ROM for efficient performance.

Wireless/Wired CarPlay & Android Auto

Connect your iPhone or Android smartphone to the car stereo for seamless integration. Enjoy navigation, make calls, send messages, and listen to music directly from your phone's interface displayed on the car radio screen.

- **Wireless Connection:** Connect via Bluetooth for a cable-free experience.
- **Wired Connection:** Use an original USB data cable for a stable connection.

Examples of the Wireless CarPlay and Android Auto interfaces, demonstrating phone calls, messages, GPS, music, and video functionalities.

Bluetooth & Mirror Link

The built-in Bluetooth module supports hands-free calling, phone book synchronization, and audio streaming. Mirror Link allows you to display your smartphone's screen directly onto the car radio, enabling you to enjoy multimedia content on a larger display.

- **Bluetooth:** Pair your phone for calls and music.
- **Mirror Link:** Connect via Wi-Fi (iOS) or Wi-Fi/USB (Android) to mirror your device.

Visual explanation of Mirror Link, showing one-way connection for iOS via Wi-Fi and two-way connection for Android via Wi-Fi/USB.

WIFI & GPS Navigation

Connect to Wi-Fi to download online apps, stream videos, and access real-time traffic information. The unit supports both online and offline GPS navigation, compatible with popular map applications like Google Maps and preloaded with Here WeGo for offline use.

Examples of GPS navigation interface and various apps accessible via Wi-Fi connection.

User Interface Themes

Personalize your car radio experience with 26 different UI themes. Choose a theme that best suits your style and preferences for a brilliant visual experience.

A selection of the 26 available user interface themes, offering diverse visual styles for customization.

Maintenance

To ensure the longevity and optimal performance of your car radio, follow these maintenance tips:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner. Avoid abrasive materials or harsh chemicals.
- **Software Updates:** Periodically check for software updates through the system settings or the manufacturer's website to ensure you have the latest features and bug fixes.
- **Environmental Care:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or high humidity.

Troubleshooting

If you encounter issues with your car radio, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No Power	Loose power connection, blown fuse, vehicle battery issue.	Check power cable connections. Inspect vehicle fuses. Ensure car battery is charged.
No Sound	Volume too low, mute enabled, speaker wiring issue, incorrect audio source.	Increase volume. Check mute setting. Verify speaker connections. Select correct audio source.
GPS Signal Lost/Weak	GPS antenna obstructed or improperly connected, driving in an area with poor signal.	Ensure GPS antenna is clear of obstructions and securely connected. Move to an open area.
CarPlay/Android Auto Not Connecting	Incorrect USB cable, Bluetooth not paired, phone software issue.	Use original USB cable. Ensure Bluetooth is paired. Restart phone and car radio.
Touch Screen Unresponsive	System freeze, dirt on screen.	Restart the unit. Clean the screen. If issue persists, contact support.
